

MORTIMER DISPLAY CABINET - COMPLETE

The Mortimer Cabinet is the just-right-sized vertical piece for today's open living and dining spaces giving the home the functional features of a china cabinet without requiring a large wall. The deck includes curio style tempered glass end panels on the deck portion, two adjustable tempered glass shelves, and recessed touch operated lighting. In the base there are two full depth drawers and one adjustable wood shelf. Built as a separate base and deck, the cabinet can be used as a base only as the base has a finished top.
