

PARIAMAN

BAR TABLE | CM-AC399

DETAILS:

Fully constructed in metal, this unique bar table is best suited for spaces that embrace the industrial trend. All the elements are here to make this the perfect piece--replicated piping accents, hand-painted copper details, and a metal mesh divider underneath. Even the overhang glassware rack and shelf is made of metal. The open surfaces made of paper veneer, however, are finished in a lighter natural tone. It creates this beautiful dichotomy between the sand black finish of the metal frames and the replicated wood, giving it much needed warmth.
