• Refer to the **RacePoint Blueprint™ Programming Guide**

Box Contents

(1) Desktop Charging Dock (DCD-200B/DCD-200W)
(1) 5V DC 2.5 Amp Power Supply (025-0098–xx)
(1) Quick Reference Guide (this document)

Unpack the Components

To unpack and install the components listed above, do the following:
1. Open the component box and remove the packing.
2. Remove the component and supplied items from the box.
3. Place the components in a location that provides for adequate cooling and ventilation, and access to connectors in order to route the source power cables and other required cables.

Specifications

Environmental	
Operating Temperature	32º to 104º F (0º to 40º C)
Operating Humidity	10% to 90% Non-condensing
Desktop Charging Dock - Dimensions and Weight	
Dimensions (H x W x D)	1.6 in x 5.8 in x 4.0 in (4.0 cm x 14.7 cm x 10.7 cm)
Weight	1.0 lb/0.45kg
Power	
Supply	5V DC, 2.5 Amp
Maximum Power	5 Watts
Compliance	
Safety and Emissions	FCC Part 15 /CE Mark
RoHS	Compliant

⚠ **ELECTRICAL DISCONNECT**: The 5V DC power adapter connected to the Desktop Charging Dock should be easily accessible in the event of an electrical malfunction.

⚠ **SURGE PROTECTION**: Use a surge-protected circuit for all components requiring 120 V AC, 50/60 Hz source power.

⚠ **ELECTRICAL DISCONNECT**: The 120V AC, 50/60 Hz source power outlet and input power sockets should be easily accessible in the event of an electrical hazard or malfunction condition.
