

GE Zoneline® Cooling and Electric Heat Unit with Makeup Air, 230/208 Volt

Model# AZ45E09DBM

- Product built to order, lead times may vary
- Makeup air - Delivers 25-50 CFM of continuous makeup air whenever the room is occupied
- Energy efficiency - When paired with occupancy sensing hardware, ventilation can be halted during vacancy
- Dehumidification - Dehumidifies at a rate of 5-6 pints per 24 hours (based on CFM level)
- Heat & Freeze Sentinels - Keeps the room from overheating or freezing
- Electronic temperature limiting - Prevents expensive over-cooling or over-heating of the room
- Electronic touch controls with LED display
- May reduce the need for individually ducted rooftop systems
- Because makeup air increases room BTU load requirements and requires additional PTAC cooling or heating, the building's electrical needs may be impacted
- Makeup air models are not recommended for installation within two miles of coastal areas
- It is strongly recommended to install makeup air with wall thermostats
- SMC base pan
- Simplified structure - Easy to maintain and service
