Old Growth Small Planter

2200-0053

In Stock | New

Overall: 14"h x 10.5"dia.

Finish: Dark Brown

Materials: Fiber Cement

Item Weight: 19 lbs.

In the tradition of faux bois, the Old Growth Small Planter is incredibly lifelike. Crafted from fiber cement in a dappled finish, the stump-shaped brown planter looks aged like an antique would had it been ornamenting a garden for decades. The way the gnarled roots culminate at the bottom is particularly convincing. This plant pot has a drain hole.
