

## New-Construction Speaker Templates

- > Provides a pre-construction placeholder for Crestron in-ceiling and in-wall speakers
- > Allows versatile positioning over wall studs and ceiling joists spaced 16" to 24" o.c.
- > Plastic and flat metal models provide a guide for cutting holes in place
- > Collared metal models accommodate drywall compound for a smooth, finished opening

These simple accessories are designed to be attached to framing prior to the installation of drywall in preparation for the installation of Crestron® speakers. They allow for versatile positioning over wall studs and ceiling joists spaced 16" to 24" on center.

Plastic models are available to fit all sizes of Excite®, Aspire®, and Essence® in-ceiling and in-wall speakers. Each model allows drywall to be installed over the template and acts as a guide for cutting the hole in place.

Metal models are available to fit all sizes of Saros® in-ceiling speakers, and are offered in a choice of flat or collared versions.

- The flat version allows drywall to be installed over the template and acts as a guide for cutting the hole in place.
- The collared version accommodates drywall with a precut hole and provides a formed collar suitable for the application of drywall compound for a smooth, finished opening.
