Superlative vinyl performance from a compact luxurious turntable/arm configuration!

Xtension 9 Evolution incorporates all our turntable design experience from more than 20 years in a slimline size to fit standard audio racks. Xtension 9 chassis is made from MDF, that gives high mass and is non-resonant. Magnetic feet, which decouple the main plinth from its base, are combined with a weighty 16kg total turntable mass. The result is a unique combination of 'massloaded' and 'floating turntable' design principles. Instead of pure metal for the main platter, we've found a perfect alloy which we damped on with thermo plastic elastomers (TPE). Additionally we've glued

recycled Vinyl records to the top (which act as a perfect mat) and bake this 'sandwich' before precision balancing it. The final product subsequently benefits from a wonderfully resonance-free, heavy platter, that runs ultra-silently on an inverted ceramic ball bearing with magnetic suspension. Pro-Ject Xtension 9 Evolution includes a top-class high-end tonearm „9cc Evolution“ and comes complete with a beautiful dustcover. 5 different high gloss lacquer finish options are available: mahogany, olive, walnut, eucalyptus, palisander, HG piano black, HG red, HG white.
