IMPORTANT— Read and Follow!

- Before beginning, please read these instructions completely and carefully.
- **DO NOT** remove permanently affixed labels, warnings, or plates from product. This may void the warranty.
- All local and national codes and ordinances must be observed. Installation must conform with local codes or in the absence of codes, the National Fuel Gas Code ANSI Z223.1 INFPA54.
- The installer must leave these instructions with the consumer who should retain for local inspector's use and for future reference.

In Canada: Installation must be in accordance with the current CAN/CGA B149.1 & 2 Gas Installation codes and/or local codes. Electrical installation must be in accordance with the current CSA C22.1 Canadian Electrical Codes Part 1 and/or local codes.

In Massachusetts: All gas products must be installed by a "Massachusetts" licensed plumber or gasfitter. A "T" type handle manual valve must be installed in the gas supply line to the appliance.

An air curtain or other overhead range hood which operates by blowing a downward airflow onto the range, shall not be used with a gas range

Your safety and the safety of others is very important.

We have provided many important safety messages in this manual and on your appliance. Always read and obey all safety messages.

This is the safety alert symbol. This symbol alerts you to hazards that can kill or hurt you and others.

All safety messages will be preceded by the safety alert symbol and the word "DANGER," "WARNING" or "CAUTION." These words mean:

DANGER

Hazards or unsafe practices which WILL result in severe personal injury or death

WARNING

Hazards or unsafe practices which COULD result in severe personal injury or death

CAUTION

Hazards or unsafe practices which COULD result in minor personal injury or property damage.

All safety messages will identify the hazard, tell you how to reduce the chance of injury, and tell you what can happen if the instructions are not followed.

IMPORTANT—Read and Follow!

A GFI shall be used if required by NFPA-70 (National Electric Code), federal/state/local laws, or local ordinances.

- The required use of a GFI is normally related to the location of a receptacle with respect to any significant sources of water or moisture.
- Viking Range, LLC will NOT warranty any problems resulting from GFI outlets which are not installed properly or do not meet the requirements below.

If the use of a GFI is required, it should be:

- Of the receptacle type (breaker type or portable type NOT recommended)
- Used with permanent wiring only (temporary or portable wiring NOT recommended)
- On a dedicated circuit (no other receptacles, switches or loads in the circuit)
- Connected to a standard breaker of appropriate size (GFI breaker of the same size NOT recommended)
- Rated for Class A (5 mA +/- 1 mA trip current) as per UL 943 standard
- In good condition and free from any loose-fitting gaskets (if applicable in outdoor situations)
- Protected from moisture (water, steam, high humidity) as much as reasonably possible

WARNING

To prevent possible damage to cabinets and cabinet finishes, use only materials and finishes that will not discolor or delaminate and will withstand temperatures up to 194°F (90°C). Heat resistant adhesive must be used if the product is to be installed in laminated cabinetry. Check with your builder or cabinet supplier to make sure that the materials meet these requirements.

DANGER

ELECTRICAL SHOCK HAZARD

To avoid risk of electrical shock, personal injury or death; verify your appliance has been properly grounded in accordance with local codes or in absence of codes, with the National Electrical Code (NEC). ANSI/NFPA 70- latest edition.

DANGER

Fire/explosion hazard. IF THE INFORMATION IN THIS MANUAL IS NOT FOLLOWED EXACTLY, A FIRE OR EXPLOSION MAY RESULT CAUSING PROPERTY DAMAGE, PERSONAL INJURY, OR DEATH.

- **DO NOT** store or use gasoline or other flammable vapors and liquids in the vicinity of this or any other appliance.
- **WHAT TO DO IF YOU SMELL GAS:**
 - DO NOT** try to light any appliance.
 - DO NOT** touch any electrical switch; **DO NOT** use any phone in your building.
 - Immediately call your gas supplier from a neighbor's phone.
 - Follow the gas supplier's instructions.
 - If you cannot reach your gas supplier, call the fire department.
- Installation and service must be performed by a qualified installer, service agency, or the gas supplier.

IMPORTANT— Read and Follow!

DANGER

CHEMICAL HAZARD

To avoid risk of property damage and/or personal injury or death; this appliance is not to be used as a heating source.

- Benzene is a chemical which is part of the gas supply to this cooking product, which is consumed in the flames during combustion. Exposure to a small amount of benzene is possible if a gas leak occurs. Formaldehyde and soot are by-products of incomplete combustion.
- This appliance contains or produces chemicals which can cause serious injury or death and which are known to the state of California to cause cancer, birth defects or other reproductive harm. To reduce the risk from substances in the fuel or from fuel combustion make sure this appliance is installed, operated, and maintained in accordance to the instructions in this document.

WARNING

MOVING HAZARD

To avoid risk of severe personal injury; this appliance requires two or more personnel while handling and moving. Possible use of appliance moving devices is recommended.

DANGER

GAS LEAK HAZARD

To avoid risk of personal injury or death; leak testing of the appliance must be conducted according to the manufacturer's instructions. Before placing appliance in operation, always check for gas leaks with soapy water solution.

- **DO NOT USE AN OPEN FLAME TO CHECK FOR GAS LEAKS.**

WARNING

TIPPING HAZARD

To reduce the risk of property damage or personal injury; install anti-tipping device provided in accordance with the installation instructions in this document. Device must be engaged properly to prevent product from tipping over.

- This range can tip.
- Injuries to persons can result.
- Install anti-tip device packed with range.
- See installation instructions.

Dimensions

Note: Units shown with standard island trim.

Specifications

RVGR3302	
Description	
Overall width	29-7/8" (75.9 cm)
Overall height	To top of side trim - 35-7/8" (91.1 cm) min. 37" (94.0 cm) max. Legs adjust - 1-1/8" (2.9 cm)
Overall depth from rear	To front of side panel - 25" (63.5 cm) To front of door - 25-3/4" (65.4 cm) To front of control panel - 27-1/8" (68.9 cm) To end of knobs - 29" (73.7 cm)
Additions to Overall Height	To top of island trim - add 0" (0.0 cm) To top of backguard - add 6" (15.2 cm) To top of high shelf - add 18-3/16" (46.2 cm)
Gas Requirements	Shipped standard for Natural gas, field convert with LP conversion kit (purchased separately); accepts standard residential 1/2" (1.3 cm) ID gas service line
Gas Manifold Pressure	Natural 5.0" W.C.P./ Liquid Propane L/P 10.0" W.C.P.
Electrical Requirements	120VAC/60 Hz; 4 ft. (121.9 cm), 3-wire cord with grounded 3-prong plug attached to unit
Max Amp Usage	0.74 amps
Surface Burner Rating Natural/LP	
Left front	18,000 BTU Nat/16,000 BTU LP/Propane (5.3 kW Nat/4.9 kW LP/Propane)
Left rear	9,100 BTU Nat/6,500 BTU LP/Propane (2.7 kW Nat/1.9 kW LP/Propane)
Center	9,100 BTU Nat/8,000 BTU LP/Propane (2.7 kW Nat/2.4 kW LP/Propane)
Right rear	12,000 BTU Nat/11,000 BTU LP/Propane (3.5 kW Nat/3.2 kW LP/Propane)
Right front	17,000 BTU Nat/15,000 BTU LP/Propane (5.1 kW Nat/4.4 kW LP/Propane)
Oven Interior Width	23" (58.4 cm)
Oven Interior Height	16-1/8" (40.9 cm)
Oven Interior Depth	Overall - 18-3/4" (47.6 cm) AHAM - 15-3/8" (39.2 cm)
Oven Volume	
Overall	4.0 cu. ft.
AHAM	3.3 cu. ft.
Approximate shipping weight	410 lbs. (184.5 kg)

Note: Clearances from non-combustible materials are not part of the ANSI Z21.1 scope and not certified by CSA. Clearances to non-combustible materials must be approved by the authority having jurisdiction.

Minimum clearances from adjacent combustible construction:

Below cooking surface (36" [91.4 cm] and below)

- Sides - 0"
- Top grate support - 36" (91.4 cm)

Above cooking surface (above 36" [91.4 cm])

- Sides - 6" (15.2 cm)
- Within 6" (15.2 cm) side clearance, wall cabinets no deeper than 13" (33.0 cm) must be minimum 18" (45.7 cm) above cooking surface
- Wall cabinets directly above product must be a minimum of 42" (106.7 cm) above cooking surface
- Rear - 0" with 6" backguard or high shelf; 0" with island trim and non-combustible rear wall;
- 6" (15.2 cm) with island trim and combustible rear wall

Clearance Dimensions (Proximity to Cabinets)

- This range may be installed directly adjacent to existing 36" (91.4 cm) high base cabinets.

IMPORTANT: The side trim MUST be 3/8" (.95 cm) above the adjacent base cabinet countertop. This can be accomplished by raising the unit using the adjustment spindles on the legs.

- The range CANNOT be installed directly adjacent to sidewalls, tall cabinets, tall appliances, or other side vertical surfaces above 36" (91.4 cm) high. There must be a minimum of 6" (15.2 cm) side clearance from the range to such combustible surfaces above the 36" (91.4 cm) counter height.
- Within the 6" (15.2 cm) side clearance to combustible vertical surfaces above 36" (91.4 cm), the maximum wall cabinet depth must be 13" (33.0 cm) and wall cabinets within this 6" (15.2 cm) side clearance must be 18" (45.7 cm) above the 36" (91.4 cm) high countertop.

- Wall cabinets above the range must be a minimum of 42" (106.7 cm) above the range cooking surface for the full width of the range. This minimum height requirement does not apply if a range hood is installed over the cooking surface.

⚠ CAUTION

Burn hazard

To avoid risk of personal injury; the use of cabinets for storage above the appliance may result in a potential burn hazard. Combustible items may ignite, metallic items may become hot and cause burns. If a cabinet storage is to be provided the risk can be reduced by installing a rangehood that projects horizontally a minimum 5" (12.7 cm) beyond the bottom of cabinets.

Note: If a range hood is installed, wall cabinets above the range have a different minimum clearance height.

Clearance Dimensions (Wood/Composite Overlay)

The bottom of a standard hood should be 30" (76.2 cm) min. to 36" (91.4 cm) max. above the countertop. This would typically result in the bottom of the hood being 66" (167.6 cm) to 72" (182.9 cm) above the floor. Refer to the range hood installation instructions for additional information. These dimensions provide for safe and efficient operation of the hood.

Note: This range ships with an island trim. There must be a minimum of 6" (15.2 cm) clearance from rear of range to a **combustible** wall or 0" clearance to a **non-combustible** wall.

Note: Minimum clearance for back wall is 0" with backguard or high-shelf.

Note: Clearances from non-combustible materials are not part of the ANSI Z21.1 scope and not certified by CSA. Clearances to non-combustible materials must be approved by the authority having jurisdiction.

Electrical & Gas Requirements

Electrical Requirements

Check your national and local codes regarding this unit. This range requires 120VAC/60 Hz; 4 ft. (121.9 cm), 3-wire cord with grounded 3-prong plug attached to unit. Must be fused separately from any other circuit.

⚠ WARNING

 **ELECTRICAL SHOCK HAZARD**

To avoid the risk of electrical shock, personal injury or death; verify electrical power is turned off at the breaker box and gas supply is turned off until the range is installed and ready to operate, installation by an authorized installer only.

Gas Connection

The gas supply (service) line must be the same size or greater than the inlet line of the appliance. This range uses a 1/2" (1.3 cm) ID NPT (Sch40) inlet. Sealant on all pipe joints must be resistive to LP gas.

The range is designed specifically for natural or LP gas. Before beginning installation verify that the model is compatible with the intended gas supply.

Manual shut-off valve:

This installer-supplied valve must be installed in the gas service line before the appliance in the gas stream and in a location where it can be reached quickly in the event of an emergency. Any opening behind the range shall be sealed.

In Massachusetts: A "T" handle type manual valve must be installed in the gas supply line to the appliance.

IMPORTANT: Any conversion required must be performed by your dealer or a qualified licensed plumber or gas service company. Please provide the service person with this manual before work begins.

Pressure Regulator:

- All heavy-duty, commercial type cooking equipment must have a pressure regulator on the incoming service line for safe and efficient operation, since service pressure may fluctuate with local demand. External regulators are not required on this range since a regulator is built into each unit at the factory. Under no condition bypass this built-in regulator.
- Manifold pressure should be checked with a manometer, natural gas requires 5.0" W.C.P. and LP gas requires 10.0" W.C.P. Incoming line pressure upstream from the regulator must be 1" W.C.P. higher than the manifold pressure in order to check the regulator. The regulator used on this range can withstand a maximum input pressure of 1/2" PSI (14.0" W.C.P.). If the line pressure is in excess of that amount, a step down regulator will be required.
- The appliance must be disconnected from the gas supply piping system during any pressure testing of that system.

Electrical & Gas Requirements

Flexible Connections:

If the unit is to be installed with flexible couplings and/or quick-disconnect fittings, the installer must use a heavy-duty AGA design-certified flexible connector of at least 1/2" (1.3 cm) ID NPT (with suitable strain reliefs) in compliance with ANSI Z21.41 and Z21.69.

In Canada: CAN 1-6, 10-88 metal connectors for gas appliances and CAN 1-6.9 M79 quick disconnect devices for use with gas fuel.

In Massachusetts: This appliance must be installed with a 36" (3-foot) long flexible gas connector.

General Information

READ AND FOLLOW ALL WARNING AND CAUTION INFORMATION WHEN INSTALLING THIS APPLIANCE.

- All openings in the wall behind the appliance and in the floor under the appliance must be sealed.
- **DO NOT** obstruct the flow of combustion and ventilation air.

CAUTION

Avoid any damage to oven vents. The vents need to be unobstructed and open to provide proper airflow for optimal oven performance.

Moving, Handling, and Unpacking

Remove and discard all packing materials, including cardboard and tape on the outside and inside of the range.

Remove the cardboard top pack containing the burner heads, burner caps, grates, leveling legs and anti-tip bracket from the top of the range.

DO NOT discard the anti-tip metal brackets (2) supplied with the range. These are the anti-tip devices and one must be installed with the unit.

Type 1 is a wall mount device which can be used for all installation applications.

Type 2 is a floor mount device which can be used for all applications other than when the range is installed on a concrete sub-floor.

Important: The range **MUST** be installed with one of the anti-tip devices.

Refer to "Anti-tip Device Installation" section.

Some stainless steel parts may have a plastic protective wrap which must be peeled off. The interior should be washed thoroughly with hot, soapy water to remove film residues and any dust or debris before being used, then rinsed and wiped dry. Solutions stronger than soap and water are rarely needed.

Installation

⚠ NOTICE

DO NOT use the handle or oven door to lift the oven. Remove door before installation to ensure that it is not used to lift the unit. **DO NOT** lift or carry the door by the handle.

Removing the door must be done by your dealer, a qualified licensed plumber, or certified gas installer.

Door Removal

Open door completely. Fold latches back until locked in place

Gently close until latches stop door.

Lift door up and out

Leg Installation

Legs are packed in the cardboard top pack.
Note: Legs should be installed near to where appliance is to be used, as they are not secure for long transit.

Note: It is strongly recommended that a pallet or lift jack be used rather than tilting. Raise unit about a foot. Unscrew temporary legs from couplings.

Screw legs into couplings on all four corners.

Lower range gently to keep any undue strain from legs and internal mounting hardware.

Leveling/Adjustments/Alignment

Measure the four corners in cutout area to verify if flooring is level.

For uneven or sloped floors, level unit with metal shims only, as the adjustment required may exceed the thread available in the leg.

Move unit into opening.

Check that unit is level side to side and front to back. Side trim of the high corner must be $\frac{3}{8}$ " (0.95 cm) above countertop.

If leveling is required, move unit out of opening.

Lift unit and prop on wood blocks.

Set the high corner of range so that the top of side trim is $\frac{3}{8}$ " (0.95 cm) above countertop. Level range to high corner.

Anti-tip Device Installation

⚠ WARNING

TIPPING HAZARD

- This range can tip.
- A child or adult can tip the and be killed.
- Failure to install the anti-tip device can result in death or serious burns to children or adults.
- If the range is moved, then the anti-tip device must be re-engaged.

⚠ WARNING

TIPPING HAZARD

To reduce the risk of the appliance tipping, it must be secured by a properly installed anti-tip bracket(s). To make sure the bracket has been installed properly, look behind the range with a flashlight to verify proper installation engaged in the rear top left corner of the range or under the range to verify that a floor hook and bracket have been installed.

Wall Mount

Measure from floor to bottom of the anti-tip opening located on the back of range. This will be measurement (A).

Locate anti-tip bracket on rear wall with the top left corner at measurement (A) plus 1/4" (.64 cm) from the floor and 7-3/16" (18.3 cm) from where the right side of range (facing range) is to be located.

Mark and drill holes where bracket will be located.

Attach bracket with mounting hardware provided.

Anti-tip Device Installation (cont.)

Floor Mount

Dim A from Rear Wall Without Standoffs	2 " (5.1 cm)
Dim A from Rear Wall With Standoffs	2 3/4 " (7.0 cm)

Refer to chart for dimension A based on whether or not standoffs are used with the rear trim device. Mark and drill 1/8" (.32 cm) holes where bracket will be located.

Mount anti-tip bracket hook to floor using screws provided.

Remove two screws from back of range.

Attach bracket to back of range using two screws.

Connecting Gas & Electric

⚠ DANGER

GAS LEAK HAZARD

To avoid risk of personal injury or death; leak testing of the appliance must be conducted according to the manufacturer's instructions. Before placing appliance in operation, always check for gas leaks with soapy water solution.

- **DO NOT USE AN OPEN FLAME TO CHECK FOR GAS LEAKS.**

Connect gas and electrical. Before placing appliance in operation, always check for gas leaks. This must be performed by your dealer, a qualified licensed plumber, or gas service company.

Final Installation

Slide range into place. Be sure anti-tip bracket slides into the anti-tip opening.

Burner heads and burner caps are packed in the cardboard top pack with the grates. Align burner head on burner base. Place burner cap on burner head. Place grate onto the burner pan.

Check that unit is level side to side and front to back. The side trim must be 3/8" (0.95 cm) above countertop. If unit is not level, repeat Steps 5-7 in "Leveling/Adjustments/Alignment" section.

Door Replacement

Carefully realign door on hinges. Slide in and down.

Open door completely.
Fold latches forward until locked in place.

Close door.

Final Preparation

- All stainless steel body parts should be wiped with hot, soapy water and with a liquid cleaner designed for this material. If buildup occurs, **DO NOT** use steel wool, abrasive cloths, cleansers, or powders! If it is necessary to scrape stainless steel

to remove encrusted materials, soak with hot, wet cloths to loosen the material, then use a wool or nylon scraper. **DO NOT** use a metal knife, spatula, or any other material tool to scrape stainless steel! Scratches are almost impossible to remove.

Performance Checklist

A qualified installer should carry out the following checks:

- Check top burner ignition. See drawing for proper flame height on HI. The low flame should light at every port.

- Check oven bake function—bake burner on full power.
- Check convection fan function—convection fan comes on when put in Convection Bake mode.
- Check broiler function.
- Check self-clean function—door will lock in approximately 30 seconds, the broil and bake burner will turn on. Check broil burner through window to make sure they are on, then abort self-clean cycle to unlock door.

! NOTICE

When conducting performance test, **DO NOT** run self-clean cycle for more than 10 minutes with oven racks inside oven. This could cause them to discolor due to the high temperature required for self-cleaning.

Service & Registration

Only authorized replacement parts may be used in performing service on the appliance.
All servicing should be referred to a qualified technician.

Contact Viking Range, LLC 1-888-845-4641, for the nearest service parts distributor in your area
or write to:

**VIKING RANGE, LLC
PREFERRED SERVICE
111 Front Street
Greenwood, Mississippi 38930 USA**

The model and serial number can be found by either tilting range back or
using a mirror to look underneath on the front edge of the bottom base.

Record the following information indicated below. You will need it if service is ever required.

Model number _____

Serial number _____

Date of purchase _____

Date installed _____

Dealer's name _____

Address _____

**These installation instructions should remain with the unit
for future reference.**

Viking Range, LLC
