

Everything You Need For Better Cooking Experiences

Cutting-Edge Performance

The IN-R230 delivers 390 CFM of laboratory-tested airflow with motor technology designed for professional-grade performance. It handles any cooking style, from delicate sauces to high-heat searing.

Replaceable LED Lighting

Two bright GU10 LED bulbs illuminate your cooktop while creating the perfect ambiance. And when they eventually burn out? You can easily replace them.

Dishwasher-Safe Convenience

Cleanup should be a quick and easy part of your routine, not a chore. The stainless steel baffle filters slide out easily for dishwasher cleaning.

Flexible Installation Options

The IN-R230 adapts to your kitchen, not the other way around. Install it ducted for maximum efficiency or convert to ductless operation with separately sold CF100 charcoal filters.

A Healthier Kitchen Environment

Studies show cooking fumes contain pollutants linked to serious health issues. The IN-R230's powerful ventilation system removes these harmful particles from your kitchen before they become a problem.

Trusted Engineering

Decades of expertise in professional-grade kitchen ventilation mean we understand what works in real kitchens. All our range hoods and inserts are designed to give you the best possible cooking experience.
