**Daifuku Large Dining Table Brown**

---

**COLORS:** Brown

**OVERVIEW**

Inspired by the softness and symbolism of Japanese mochi, a traditional soft rice cake whose name translates to good luck, the Daifuku dining table features rounded edges that create an illusion of gentle softness while bringing comfort to reality. Exquisite craftsmanship meets the allure of Japanese tradition as joinery detailing underscores the chair's solid white ash construction, perfectly balancing strength and grace.

- Solid white ash construction featuring dowel joint joinery with an 8-person seating capacity
- Please note that no two items are alike, there will be a natural variation between each piece due to the wood's distinct character, grains & knots in each piece of wood
- Product is made with kiln dried ash wood. Solid woods react dynamically to their environment & may swell & crack with changes in humidity & temperature, the kiln-drying process prevents the wood from warping or developing small cracks over time, resulting in highly durable furniture. Kiln-dried wood doesn't require harsh chemical treatments as the heat effectively sanitizes it
- Constructed from ash wood certified by the National Hardwood Lumber Association (NHLA®), who lobby for forest management & work to strengthen the status of the entire North American hardwood industry
- Some assembly required
