

# MLILY®

With a firm feel, the WellFlex 1.0 is specially designed to ensure a cool, supportive night's sleep. The Gel and Performance Memory Foam layers provide added breathability, increased comfort, and extended coolness with a Cooling Knit Fabric Cover.

Cooling Knit Fabric Cover

1" Gel Memory Foam

2" Performance Memory Foam

9" Flex Support Base Foam

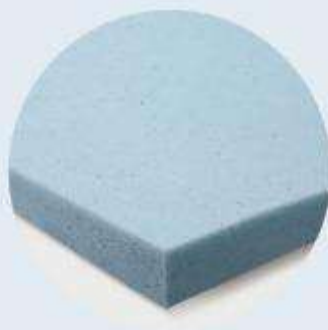

## WellFlex 1.0

### Cooling Knit Fabric Cover

This cover not only breathes, but the air flow creates a cooling sensation keeping you comfortable while you sleep. This highly advanced fabric stays cool-to-the-touch due to its superior breathability and temperature regulating properties that move heat away from the body.

### Gel Memory Foam

This memory foam is generously infused with a cooling gel. It keeps all of the favorable properties of memory foam, like contouring and conforming to the sleeper, while mitigating temperature issues with the gel infusion.

### Performance Memory Foam

This foam is all about versatility. It mixes durability, flexibility, and adaptability into a single memory foam. Performance Memory Foam is often used as a mid-section foam due to its ability to fully support the more breathable foams above it while allowing them to gently contour to the sleeper.

### Flex Support Foam

Flex Support Foam is often the bottom layer of our mattresses. A mattress must provide the necessary support to keep the spine aligned so the sleeper's muscles relax instead of tightening to compensate. This high-grade foam completes the bottom of the mattress to provide long-lasting durability and support for the top layers.
