THE POWER TO POWER DOWN

Cut electricity to the microwave by pressing the Energy Setting, so it's not drawing energy while you're away, helping you conserve energy.

MEALS DONE RIGHT

Get consistent results without wasting time or energy. Sensors measure humidity in the microwave and automatically adjust cooking time, so food is done right the first time.

KEEP AN EYE ON YOUR FOOD

The large glass window lets you keep an eye on the progress of your food without having to stop and open the door.
