Base Foam	Stability Foam

Glacier Touch™ 4-Way Stretch Cover
Glacier Touch™ 4-Way Stretch Cover with Lycra® Fabric is cold to the touch for a cooler, comfortable night's sleep.

Copper Gel Memory Touch® Foam
Copper Gel is an exciting, new additive in our Memory Touch® Foam. Microscopic, copper-infused gel beads are incorporated into foam. The high conductivity of copper complements and enhances gel's thermal properties to help dissipate excess body heat, providing a cooler and more comfortable sleep.

Repreve® Fiber
Recycled plastic bottles are transformed into a quality textile fiber, that's sustainable! So far, over 4 billion plastic bottles have been recycled into this comfortable, long-lasting fiber.

iFlex® Hybrid Quilt—Patented
Featuring over 2,040 micro coils, which are integrated into the quilting for unparalleled breathability, support and durability. iFlex®—the Ultimate Sleeping Surface in the World!

TheraWrap® Individually Wrapped Coils
TheraWrap® Individually Wrapped Coils featuring edge to edge support provide a full uniform sleep surface and are designed to flex and conform independently of each other, reducing motion transfer and helping to eliminate partner sleeping disturbance.

Sanitized® Finish
Our zinc-based process inhibits bacteria and permanently prevents undesired growth of microbes. It inhibits bacteria, mildew, and dust mites to keep your mattress fresh and comfortable.

WindanSea SOFT (PILLOW TOP)

15 Year Non-Prorated Warranty
