Materials:

Poplar Hardwood, MDF, Cherry
Veneer

Shape: Round

Product The color is medium to dark brown

Features: Exceptionally built using Poplar Hardwood, MDF, Cherry Veneer
Construction Details: Expertly handcrafted from poplar hardwood solids and durable engineered wood, providing both strength and longevity. The top surface, crafted from premium oak or cherry veneers, highlights the rich wood grain, enhanced by a distressed finish that adds character to each piece. The turned pedestal and cabriole legs not only offer classic style but also provide stability and support, allowing a weight capacity of up to 45 pounds. Kiln-dried wood construction ensures resistance to warping, making it ideal for long-term use in various environments, including commercial spaces. Plastic floor protectors on each leg help safeguard floors, while the quality materials and construction techniques promise enduring beauty and reliability.

Shape is round

Product Dimensions: 13.75"W x 13.75"D x 36.5"H, Item Weight: 9 lbs
Item requires full assembly with provided hardware

Complete your perfect look by mixing and matching your decor with the extensive range of products from Butler Specialty Company! Discover endless possibilities to express your style and create a space that truly feels like home.

A plant stand base made from poplar hardwood offers several advantages. Poplar is a durable and resilient wood, providing excellent support and stability for holding heavier plants or decorative items. Its fine, even texture allows for smooth finishes, which enhances the appearance and overall elegance of the stand. Poplar is also known for being relatively lightweight compared to other hardwoods, making the plant stand easier to move around as needed without sacrificing strength. Additionally, poplar hardwood is less prone to warping and splitting, ensuring that the stand maintains its structure and beauty over time, even with regular use. This makes it an ideal choice for both residential and commercial environments where reliability and aesthetics are equally important.

Plastic floor protection on furniture, such as a plant stand or stool,

provides a valuable layer of defense for both floors and furniture. It prevents scratches, scuffs, and other damage to delicate flooring surfaces like hardwood, tile, or laminate, preserving their appearance and extending their lifespan. Plastic floor protectors also help to stabilize furniture, reducing the likelihood of slipping or shifting, which is especially useful in high-traffic areas or commercial settings. This small yet essential feature makes the piece more versatile and floor-friendly, allowing it to be safely placed on a variety of surfaces without causing harm.

Weight Capacity: 45 lbs

Ideal to use in a living room, dining room, sun room, office or many different commercial settings.

To clean, wipe clean with a clean dry cloth and dust regularly. If spills occur, wipe spills with a damp cloth and dry immediately. No abrasives or household cleaners which can damage the product.
