NET RELEASE V2134

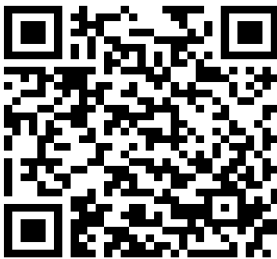

NOVEMBER 6, 2025

Overview

Software update NET release v2134 adds performance upgrades to our Modern Audio network model AV Receivers, most notably with the addition of [Qobuz Connect](#) support.

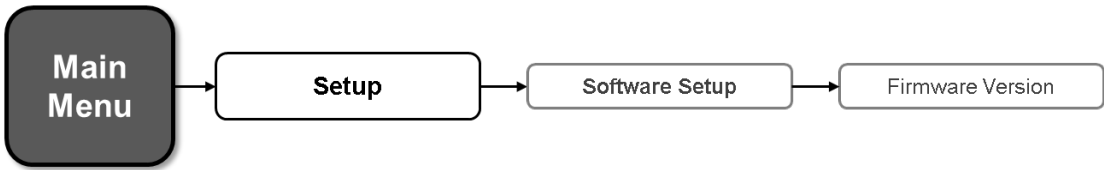

Software updates occur automatically by regularly checking for an over-the-air update (requires external network connection). Do not power off the Receiver while an update is in progress.

To set up your receiver on your home network, download the JBL PREMIUM AUDIO app to your smartphone or tablet.

Display the current firmware versions

Navigate using the remote control via the on-screen display (HDMI) or front panel display.

Once the automatic update process is complete, verify the Firmware versions have been updated. Current versions will show the following per the corresponding model:

MODEL	MA510	MA710	MA7100HP	MA9100HP
MAIN HOST	1.64	1.77	1.92	1.92
DECODING DSP	1.39	1.19	1.19	1.19
OSD FONT	1.48	1.42	1.42	1.42
BLUETOOTH	-	2.33	2.33	2.33
NETWORK	0.100.2134	0.100.2134	0.100.2134	0.100.2134

*MA510 Bluetooth included in NETWORK module version
