Alarm/thermometer included	Temperature monitoring device (TMD) displays the current and min/max temperature of the refrigerator interior, with an audible alarm to alert if the unit goes out of range
Buffered temperature probe	Thermometer probe is encased in a glycol-filled bottle to better simulate the temperature of stored contents instead of refrigerator air temperature
External temperature readout	Thermometer is designed to be placed on the door, allowing you to view the interior temperature without opening the door and exposing stored contents to warmer air
Fan-forced cooling	Refrigerator section includes a factory-installed fan to help ensure a more evenly cooled interior
