Features

An original Buddy Whitlock painting.
Abstract design on canvas stretched over a pine wood frame.

Replicated from an original Buddy Whitlock painting, our print technology uses ink with a similar composition to acrylic paint.

The technology allows for layers of ink to be built up and made dimensional, duplicating the texture that exists on the artist's original painting.

The print technology combines colors, layers of texture, and a slight gloss finish giving the most realistic replication possible.

Frame is made from poly fiber with added color and texture for a ready to install finished look.

D ring hardware is included on each piece of art for easy installation.
