Included controls

Included eFIRE mobile app

Providing a more connected and convenient experience by controlling every setting right from your mobile device including on/off, flame height and blower speed, top light, and more!

Included remote

Enjoy added convenience with the included remote—control every function of your fireplace, including power, thermostat, flame, top lights, and blower speed, from the comfort of your couch.

Optional heat management

Dynamic Heat Control™ (DHC)

Optional system that enhances performance and lowers wall temperatures. This system works without a fan for quieter operation and is perfect for situations where heat-sensitive objects, like a wall-mounted TV, need to be placed directly above the fireplace and recessed. It offers the lowest height clearances for TV or artwork installations.

Dynamic Heat Control Plus™ (DHC+)

Optional system to add to your DHC to move the heat to other areas within your home or even outdoors.

Ducted Heat Management (DHM)

Offers the greatest amount of flexibility for installations with multiple configurations available, including an option where you can install the fireplace as a room divider and safely pass cables through the wall for ease of electronic installation. Enjoy true zero clearance to combustible materials without fear of heat damage.

Hot air distribution kit (LHAD)

Efficiently moves warm air from the fireplace to a different room or outdoors using flexible ducting.

Innovations

Battery back-up control

In the event of a loss of power, your fireplace will still light and keep you warm—requires 4 AA batteries or power bank to charge (not included).

Direct vent

Effectively removes exhaust and fumes from your space, keeping your indoor air clean while also conserving energy.
