

CAITLIN DRAWER CHEST

The Cascade Collection features a design built around contrasting materials and textures. This approach offers an end result that can create unique interest and personality while at the same time remain uncluttered. The Drawer Chest is a highly functional example of this. The distinctive look of the coarse wood grain of solid Ash becomes an aesthetic feature against the smooth grain of solid Maple. Bar pull hardware with completes the look. Hidden inside the soft-close drawers are removable dividers in the second and third drawers.

- Six drawers, second and third drawers have wood dividers, hand holds in back of case and adjustable levelers.
- Alder & Oak

Solid Wood - Made using genuine solid wood construction
