Features

Grade A teak is uniform in color, finish, and hardness. Naturally high in oils, grade A teak protects itself better than a lesser grade teak wood.

Plastic Floor protectors under the legs with adjustable levelers

Wide plank and unsealed teak wood designed table top.

Sustainable materials and zero waste packaging are used to produce this product.

For a long life, covering your outdoor product or storing indoors when not in use is recommended. Over time, a silver patina emerges enhancing the natural characteristics of teak wood.

The handcrafted nature of our products creates unique pieces, each with their own characteristics and variations. We take pride in these artisanal features, as they are an essential part of our brand's aesthetic.
