Designed to elevate your space

YOUR BENEFITS

Experience the warmth, depth, and authentic detail of your records with stable playback that reduces distortion and preserves musical nuance.

Bluetooth streaming offers the freedom to enjoy your vinyl wirelessly through speakers or headphones anywhere in your home.

A die-cast aluminum platter, vibration-resistant chassis, and balanced S-shaped tonearm work together to minimize resonance and deliver stable, high-fidelity playback.

The DP-500BT's belt-drive system isolates motor vibration, delivering stable rotation and clean, detailed sound that preserves the authentic character of your records.

With auto tonearm lift and stop, the DP-500BT protects your stylus and records while making playback easier and more convenient.

The DP-500BT includes a built-in switchable phono preamp, letting you connect directly to powered speakers or amplifiers without additional components.

The DP-500BT elevates your home with refined style, blending timeless design and modern elegance into a centerpiece that enriches every listening experience.
