

Leathers

Crypton Leather

All of our leathers are Crypton® leathers. The result is stain, water, and bacteria-resistant leathers that have the same look, feel, and smell as unprotected leathers. They are highly durable, making them ideal for both residential and hospitality use.

Please note that leather, as a natural product, has variations in both color and pattern that occur from hide to hide and even within single hides. Additionally, all swatches have been color-corrected to match the material being represented. However due to calibration variations between monitors we cannot guarantee that the colors seen on your screen or printer exactly match the finish.
