OBSESSED WITH HIGH RESOLUTION

M200

HI-FI EARPHONES

Design by Studio F. A. Porsche. Sound by KEF.

Legendary speaker brand creates on-ear and in-ear headphones for perfect blend of sound and design

Sound by KEF

KEF is a world leading British speaker brand with over 50 years of innovation in pursuit of the clearest and most accurate reproduction of recorded sound. With a track record of pioneering award-winners from professional studio monitors in the 1960s to the legendary Reference Series and the most recent ground-breaking Muon and Blade, no other brand can equal KEF's long list of design 'firsts'.

Like every KEF speaker, large or small, the M200 in-ear headphones embody the same ethos: quality engineering to enhance the enjoyment of pure sound.

High resolution sound

A brilliant example of KEF's technology leadership, the M200 delivers stunningly transparent hi-res quality sound on the move. With dedicated miniature dynamic drivers and a combination of advanced materials and clever ergonomics, the M200's output has been expertly tuned by KEF's acoustic engineers to reveal the most delicate nuances in the original recording.

Combining a 10mm LF driver and a 5.5mm neodymium MF/HF driver, KEF's unique Dual Dynamic Driver (DDD) array creates a highly detailed and engagingly natural sound, right across the frequency range - the LF chamber in the light aluminium housing creates tight, resonance-free bass. The secret to its immaculate balance is that the MF/HF driver is placed so as to accommodate a port from the bass chamber into the inert cast aluminium chamber that feeds the combined output into the ear canal.

More comfort, less noise

KEF's discreet, flexible Secure Arm folds neatly to the shape of the ear to hold each earpiece in place, even under vigorous movement.

Together with an ergonomic shell, soft silicone tips fit snugly over the ear canal to form a tight acoustic seal that eliminates external noise. Three different tip sizes are included for the best possible fit. The M200 in-ear headphones feel so comfortable even after prolonged listening, you soon forget you're wearing them.

Fits all your devices

The M200 is designed to work with most smartphones, computers and other mobile devices, and features an integrated audio cable with in-line remote control for iPhone and Apple products with full remote functions, allowing you to switch between calls and music. A flight adapter is also provided for frequent travellers and a smart, pocket sized case protects your headphones when not in use or on the move.

Protect your hearing

For your comfort and safety, KEF headphones are designed to comply with the CENELEC standard EN60065/A12 for protection against excessive sound pressure.

In the box

- A pair of M200 Hi-Fi Earphones
- High performance audio cable (1.2m) with gold plated connector, 3-button remote control and microphone
- Protective case
- Flight adapter
- 3 pairs of replaceable silicon eartips (S, M, L)

Made for iPod iPhone iPad

Specifications

Model	M200
Driver	5.5mm and 10mm
Frequency Response	20~20kHz
Sensitivity	94dB±4dB (IEC-318 at 1KHz)
Impedance	12±10% Ohm
Maximum Input Power	10mW
Noise Attenuation	-30dB
Cable length	1.2m
Connector	3.5mm
Weight	26g
