DEVANE

This table is the ideal blend of function and design. Finished in an airy Driftwood stain, the rectangular table stands on four intricately carved legs for a firm and anti-falter base. The table is finished and sanded in multiple stages, in order to distress it and give it the look of a well-loved antique. It has a pull out ledge with antique brass finished hardware for extra surface area. The table has a wide shelf at the bottom, which can be used as a display or additional storage space.
