

EVERY DROP
IS WONDERFUL

StillPure™
FRANKE WATER FILTRATION

MAKE IT WONDERFUL

FRANKE

HOW DO YOU KNOW IT'S PURE?

Invisible to the eye and even to the tongue, there are contaminants, lead, toxins, industrial pollutants, pesticides, and even dangerous diseases being passed through local water systems into our nation's homes. Unfortunately, filtration pitchers don't offer much real protection, and bottled water just creates more refuse in landfills and pollution from shipping.

A HEALTH-FOCUSED KITCHEN

Water isn't just something that comes out of the tap—water brings life to your kitchen. The cornerstone of healthy living, properly filtered water is just as important for preparation, cooking, and cleaning, as it is for drinking. Only Franke StillPure gives you the confidence that every drop is as pure as possible, so that every single drop will be wonderful.

PURE WATER, WHERE YOU NEED IT

When you understand the importance of truly pure water, you'll want to use it for everything you do in your healthy kitchen. So we created point-of-use faucets that deliver completely filtered water where and when you need it. You can instantly rinse, prep, and cook with the cleanest water, because it's always right at hand with Franke StillPure.

FRANKE POINT-OF-USE FAUCETS

With filtration features discreetly tucked away to keep your sink area beautiful and keep your workspace open, Franke point-of-use faucets offer ample options that work for your specific needs. Whether you prefer the simplicity of a single-source faucet or the utility of a 3-in-1 faucet, there are many design-driven and functional Franke faucets that deliver filtered water exactly where you need it.

CONFIDENCE TO KNOW IT'S PURE

You'll have total confidence thanks to **Bluetooth®** connectivity. Your Franke StillPure filter provides your smartphone app with usage data, notifications for upcoming filter changes, and even offers one-click ordering so new filters can be delivered directly to your door. Whether you're rinsing, cooking, or prepping, only Franke StillPure lets you know for sure that your water is as pure as possible, because your filter is working and up to date.

STILLPURE APP

Displays running total of water filtered

Displays running total of water bottles saved

Re-order new filters right from the app

Filter monitor - % of filter used

Displays running total of dollars saved

Filter monitor - days remaining

THE FRANKE STILLPURE SYSTEM

Water quality determines everything in your kitchen, and your life. Franke StillPure app takes the guess work out of knowing when to replace your filter. StillPure tells you to change the filter before it starts passing contaminants on to your family. And there's an entire family of Franke StillPure products to choose from, to make your kitchen water pure, stylish, and fully functional.

PRIMARY FILTERS FOR FRANKE FILTRATION CANISTER

Reduces Chlorine	FRC06 • FRX02* • FRC07
Reduces Chlormine	FRC07
Reduces Particulate & Turbidity	FRC06 • FRX02* • FRC07
Reduces Lead	FRC06 • FRX02*

PRE FILTERS FOR DUAL FILTRATION CANISTER

Reduces Fluoride	FRC08
Reduces Sediment	FRC09
Reduces Limescale and Hardness	FRC10

*FRX02 only works with canister FR9633 (not pictured)

^AAll in one filter for cleaner water and healthier living.
^BThe fluoride reduction cartridge reduces unwanted naturally occurring and added fluoride to safe levels in your main supplied drinking water.
^CIn areas of high sediment, installing a Franke pre-filter will remove sediment and particles down to 5 microns in size. It also protects the second ceramic filter in a DUO setup by preventing the need for excessive cleaning, thus prolonging its life and effectiveness.
^DThis cartridge will reduce hardness of drinking water and the unpleasant taste that hard water can have. It will improve limescale buildup in kettles and reduce the film that can form on the surface of hot drinks.
