"The MAC Motion Chairs Difference"

With over 30 years of experience in motion, MAC Motion has an industry objective to offer the highest quality motion chairs available in America's most competitive retail price points. MAC has brought the European designs to an unheard-of price level without the sacrifice of quality.

CONSTRUCTION

Hardwood frames combined with 11-16ga. tubular and plate steel are used in the structural portions of the construction. We use bolts, not screws, to add to the connectors. Tubular steel with nylon webbing surrounded in 1.8" density foam combined with one inch of "MX-2" 2.5lb memory foam, all added to our entire Oslo Collection and a portion of the Comfort Chair Collection. Some other products feature a soft yet firm pillow top seating to provide you with the highest comfort level is then placed at the top of the seat, backs and arms. All the aspects combined, are designed individually to compliment the chair model chosen. "This is why diverse chair styles are required, to meet the demands of individual comfort requirements."

MOVEMENT

Total adjustment to the multiple position recline creates a "stop anywhere" approach to find that personalized comfort level. Easy twist knob control allows the tension adjustment with a mere turn of the handle. During the recline movement of the back, the seat level will also elevate to bring the proper position for leg and lower back support. This has many advantages including the positive position of blood circulation. Great for personal adjustments to the individuals that vary from short to tall. All our seating is complemented by matching ottomans that are styled with an angle for not only appearance, but support. The lower position of the feet to the knees helps assist in proper seating required for body wellness. Full 360-degree swivel adds versatility to place the models in the most locations within the home.

COVERS

The final step in the master design of all MAC Motion products is that of top-quality leathers and breathable air leathers for longevity which is double sewn inside and out. Matched with either heavy leather match (pvc) or 100% leather product, these models are meant to give all over comfort to your finished seating. Durable microfibers supported by nylon backing not only give the soft touch feel to selected models but is complimented with easy to clean surfaces.

FINISH

Available in a variety of finishes to match any décor, MAC Motion prides itself on finding the proper color combinations to fit all room settings. Each have various tones, but lend themselves to walnut, merlot, alpine, midnight, and chrome accents.

WARRANTY

1 year for all normal use on parts of the product to the original purchaser and will repair and/or replace part which fails due to the manufacturing defects and/or workmanship from date of original purchase. This warranty is limited only to repair and/or replacement at manufacturers option when product is used under normal conditions. This warranty is in effect from the date of purchase by the original purchaser and does not apply to damage caused by fire, accident, negligence, misuse, improper cleaning or other circumstances not directly attributed to manufacturing defects. Dated proof of purchase and product law labels are required. For customer service please contact your nearest authorized "MAC Motion" Dealer.
