

LEATHER

As with all things in nature, no two hides will be exactly alike. We travel around the world and devote many hours to hand select the finest leathers with a natural appearance and distinctive markings that impart unique character. These distinctive features are unique to genuine leather, a product which has been raised rather than engineered. This truly unique upholstery material is a hallmark of Hancock & Moore seating.

Note: We classify our leathers based on their characteristics, not quality. The classes vary based on the performance of each leather for different lifestyles.

COMMON LEATHER MARKINGS

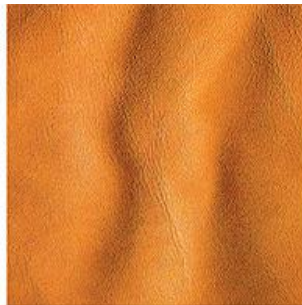

- A. Cattle ranchers use distinctive brands to identify their steers, these brands are rarely seen on furniture.
- B. Healed scratches from barbed wire nicks are common markings on an unaltered hide.
- C. Pore patterns (the hide's grain) distinguish the surface of the unaltered hide.
- D. Neck and shoulder wrinkles look like furrows.
