

WAGNER FOUR DOOR CONSOLE

The Wagner Four Door Console is designed to function well in a variety of settings. Shown here as a large entertainment console, it can be used alone or flanked by one - or more - of the Wagner Cabinet for larger spaces. It uses framed, fluted glass on the door fronts to maintain a clean, transitional style. Behind the two middle doors is a single, large open space with one adjustable shelf. There is also an adjustable shelf behind each of the two end doors. And to assist with electronics, there is an electrical outlet integrated into the back of the piece.

- Alder

Solid Wood - Made using genuine solid wood construction

Electrical Cord Management - Electrical outlets built in for convenience
