VR20T6001MW – Jetbot Mop

# Core Messaging - VR20T6001MW

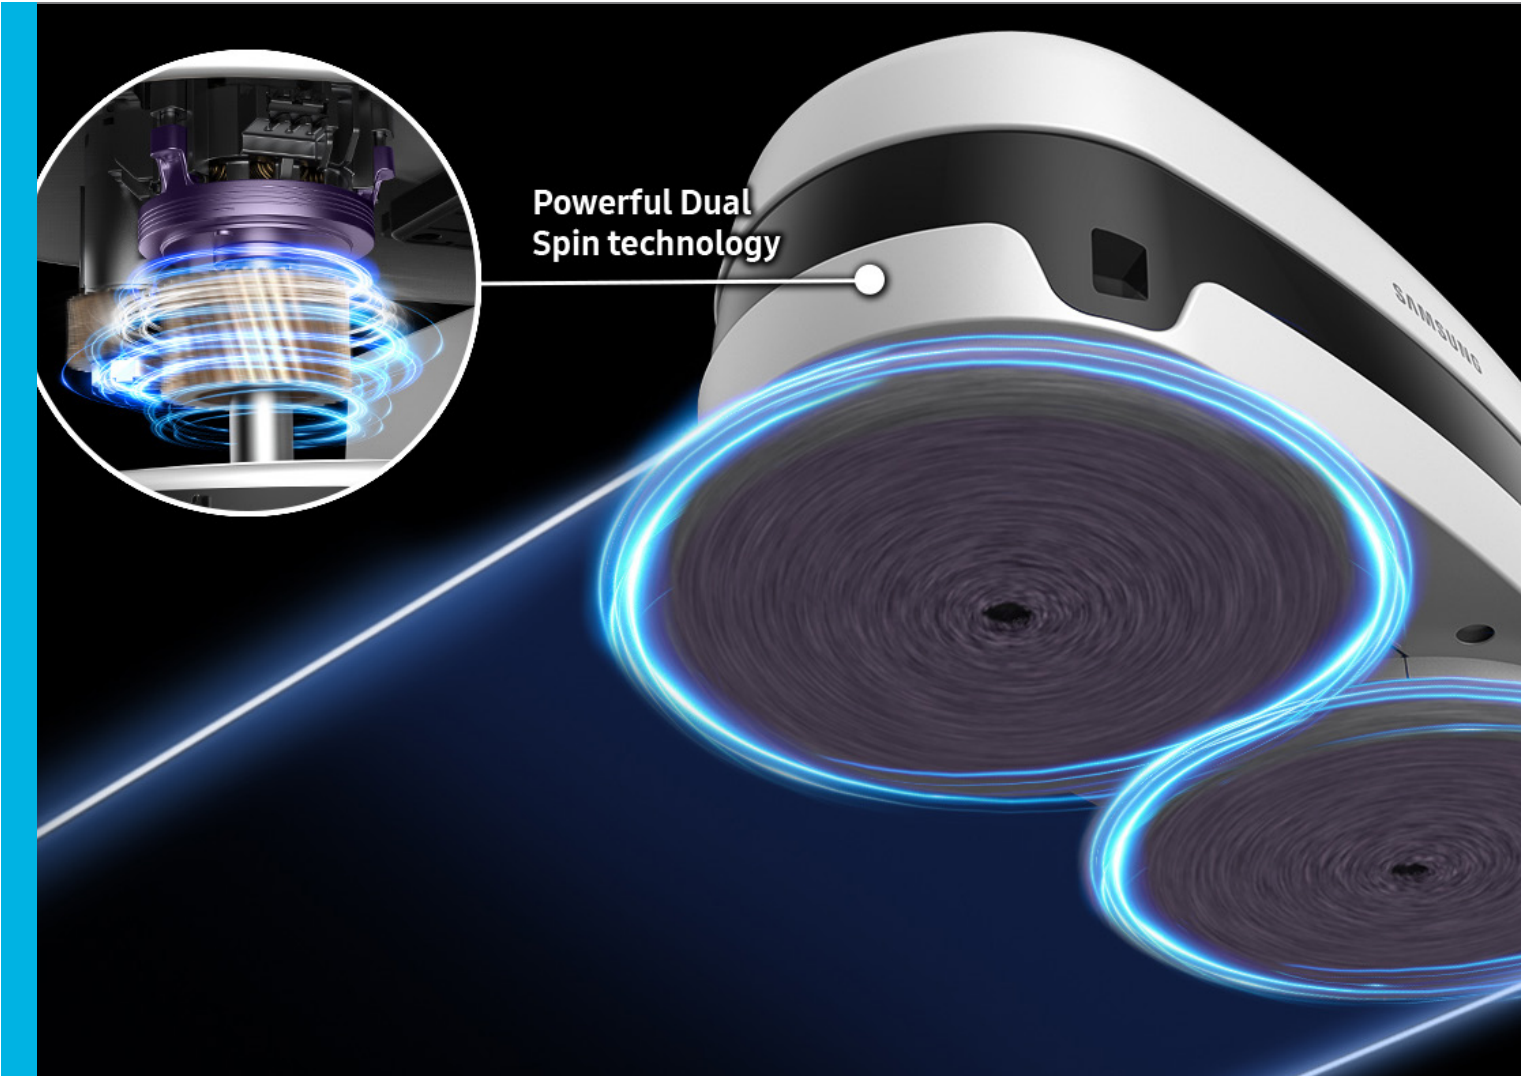

Priority		Feature	Short Copy	Long Copy
Primary Features	1	Simplicity in Action	Avoids obstacles as wet spinning pads remove dust and grime.	Designed to make your life easier, the Samsung Jetbot Mop automatically navigates around your home while avoiding obstacles, as two moist, spinning pads made from advanced fabrics mop your floors from wall to wall to remove dust, stains and grime.
	2	Dual Spin Technology	Two spinning pads turn and clean simultaneously for maximum results.	Clean effectively under beds and sofas, and on all types of flooring including tile and hardwood, with the Jetbot Mop’s powerful Dual Spin technology. Two pads spinning at high rates of speed allow the unit to move, turn and clean simultaneously for maximum results.
	3	Automatic Water Disperser	Double water tanks allow for up to 50 minutes run time without any refill needed.* <small>*Based on internal testing in an area with furniture arranged in a similar way to a real home setting. The two water tanks need to be refilled every 50 minutes.</small>	Double water tanks allow the Jetbot Mop to run for up to 50 minutes* without any need to refill, dispersing just enough water to keep the pads thoroughly moisturized while minimizing the amount of drying time.  <small>*Based on internal testing in an area with furniture arranged in a similar way to a real home setting. The two water tanks need to be refilled every 50 minutes.</small>
Secondary Features	4	Smart Sensor System	Safely cleans corners and avoids walls, carpeting and furniture.	Clean corners precisely and safely while avoiding walls, carpeting, furniture or objects thanks to the Jetbot Mop’s smart sensors. The system even stops the unit from dropping off steps or stairs, ensuring risk-free operation.
	5	Superior Edge Coverage	Spinning pads extend from under the unit to clean corners and wall edges.	Designed to clean along hard-to-reach areas, the Jetbot Mop’s spinning pads are intelligently positioned to extend from under the unit so it can thoroughly remove even more dust and hair.
	6	Long-Lasting Battery Life	High-capacity battery allows you to mop for up to 100 minutes on a single charge.	Save time by cleaning for longer periods in one go with the Jetbot Mop’s high-capacity battery with the capability to mop for up to 100 minutes. You can mop a large floor area, from corner to corner, without the need for additional charging.*  <small>*Because of this capacity, it may also allow you to mop multiple times on a single charge.</small>
	7	Multiple Cleaning Modes	Switch between 8 cleaning modes with the handy remote control.	The Jetbot Mop represents flexibility at your fingertips, with 8 cleaning modes. Choose Focus Mode to concentrate on a particular area, or let the Jetbot Mop move around freely on Random Mode. Switch modes from anywhere in your house with the handy remote control.
	8	Hand Mode for Floor-to-Wall Cleaning	Manually clean wherever you want using Hand Mode.	The Jetbot Mop is so versatile, it lets you clean by hand where other mops can’t reach. Hand Mode lets you manually clean where you want, to remove stains on kitchen and bathroom tiles, or wipe off marks on a wall.
	9	2 Types of Pads	Choose Microfiber or Mother Yarn, which is 100x thicker than Microfiber. Both are machine washable.	The Jetbot Mop comes with two sets of machine-washable pads. The Microfiber pads are ideal for everyday mopping, while the Mother Yarn pads are 100x thicker than the Microfiber and are best for heavier duty mopping like cleaning up spills.
