Product Description

This teak patio dining chair with arms is great for dining tables and sitting outside on its own. This naturally weather-resistant hardwood may be maintained to preserve the warm look as shown or allowed to weather naturally to a beautiful silvery gray patina. Plantation-grown teak.

Features

- Plantation-grown teak is harvested from mature trees that are part of a replenished forestry program, then the teak is oven- or air-dried for moisture control
- Hardware is zinc-coated steel that has been plated in brass. The zinc helps minimize corrosion, steel was chosen for strength and brass for its luster
- You may choose to allow your natural teak to weather to a beautiful silver-gray patina or treat it with an oil or sealer specifically made for natural teak twice a year to preserve the natural teak's rustic finish
