

SKSFD4826MT

48-inch Built-In French Door Refrigerator, Pre-Assembled, Transitional Design

SKS

Pre-Assembled Professional Stainless Steel Panels, Handles & Frame Kit

Pre-Assembled, for a simplified and faster installation.

Signature Fit™ Proud or Flush Design

Versatile design allows for 3/4" proud installation in existing 24" deep cabinets or true flush installation in 25" deep cabinetry. All drawers line up with standard countertop height a seamless look.

Dual Compressors & Dual Evaporators For Precise Preservation

Always keeps temperature fluctuation within +/-1° F to enhance food freshness for longer period of time*. Separated cooling from refrigerator and freezer keeps compartments at optimized humidity.

Convertible Fridge/Freezer Drawer

Innovative convertible fridge/freezer drawer offers five preset temperatures zones for precise food preservation: chilled wine, fridge deli, meats and seafood, cold drinks, or drop the temperature all the way down to make it a freezer when you need it.

Internal Water Dispenser & Dual Ice Maker With Craft Ice®

The internal water dispenser delivers cold, fresh, filtered water with a simple touch. Options for both the slow-melting, spherical Craft Ice and frustum ice elevate beverages of all kinds.

*Based on TÜV Rheinland test results using LG's internal testing method measuring the average peak to peak temperature fluctuation in the fresh food compartment at the factory temperature setting under no load condition. Applicable models only. The result may vary in actual usage.

48-inch Built-In French Door Refrigerator, Pre-Assembled, Transitional Design

Cutout Dimensions - Flush and Proud Installation

* A minimum 4" (102 mm) finished return that matches the cabinet exterior is recommended on all sides and the top of the cutout opening. The shaded area will be visible after installation.

Installation Clearances - Flush Installation

Top View

Notes

Door Swing Clearances - The installation must allow for clearances to adjacent walls or cabinets. This refrigerator is equipped with a 2-position door stop. The factory-set 115° door swing can be adjusted to 90° if clearance to adjacent cabinets or walls is restricted.

Door Handle Clearances - The pre-assembled unit uses a Stainless Steel Door Panel Kit w/Handles with the Brushed Aluminum Handles. The door handle clearance with door open 115° is 12 3/4" (323 mm).

Notes

Proud or Flush Installation

Refrigerator installs proud in a 24" deep cutout. The pre-assembled panel protrudes with 3/4".

With a 25" (635 mm) cutout depth, the front face of the refrigerator fits flush with 25" (635 mm) depth adjacent cabinets.

Electrical

A 115V, 60Hz., 15 amp power supply is required. An individual properly grounded branch circuit or circuit breaker is recommended. Install a properly grounded 3-prong electrical receptacle recessed into the back wall. Electrical must be located on rear wall as shown.

Note: GFI (ground fault interrupter) is not recommended.

Water Line

A cold water supply is required for automatic icemaker operation. Water pressure must be between 20 and 120 p.s.i.

Tubing should be long enough to extend to the front of the refrigerator. Allow enough tubing to accommodate a bend leading into the water line connection.

Water line can enter an opening through floor or back wall.

Install a shut-off valve between the icemaker water valve and cold water supply in the home.
