# BLUESOUND®

PULSE FLEX

TAKE YOUR HIFI WITH YOU. The PULSE FLEX is a game-changing 2-way speaker that delivers the best of both performance and portability. This ultra-compact wireless speaker will change the way you think about personal audio.

Mount a pair in the corners of a large room, hide one on a bookshelf, take one out to the patio table or throw one in your bag for a picnic – the PULSE FLEX allows you the true flexibility you've been waiting for in a multi-room streaming music system. And for the first time ever, Bluesound extends the concept of home HiFi beyond the home itself.

Like all PULSE all-in-one Players, when used in pairs, the PULSE FLEX is designed to create a large stereo sound field that will expand the way you think about portable speaker performance.

An optional battery pack delivers up to 8 hours of high-res streaming autonomy, and all Bluesound Players are enabled with Bluetooth aptX®. You can now enjoy HiFi performance virtually anywhere you want to go.
