## Please Read Before Operating Your Air Purifier

The air purifier draws in room air through the air inlet, circulates it through a Pre-Filter, an Active Carbon Deodorizing Filter and a True HEPA Filter inside the product, and then discharges it through the air outlet. The True HEPA Filter can remove 99.97% of dust particles as small as 0.3 microns that pass through the filter and also helps absorb odors.

The Active Carbon Deodorizing Filter gradually absorbs odors as they pass through the filter.

Some odors absorbed by the filters will break down over time, causing additional odors. Depending on usage conditions, and especially if the product is used in environments significantly more severe than a normal household, these odors may become noticeable sooner than expected. If these odors persist, replace the filters.

When minerals in tap water adhere to the filters and become hard and white, they absorb odors in the room that can cause the emission of an unpleasant odor when the Humidifying Filter is dry. (Varies depending on water quality and other environmental factors)

If this occurs, perform the Humidifying Filter maintenance. (Page 19)

### NOTE

- The air purifier is designed to remove air-suspended dust and the odors. The air purifier is not designed to remove harmful gases such as carbon monoxide contained in cigarette smoke.
- The air purifier may not completely remove an odor if the source of the odor is still present.

ENGLISH

## REPLACEMENT AND MAINTENANCE CYCLE

Filter Name	Maintenance Cycle	Max Service Life	Replacement Filter Model
True HEPA Filter	Whenever dust accumulates, when odor emanates from the air outlet, or once a month.	2 years <sup>*1, 2</sup>	FZ-P11HFU
Active Carbon Deodorizing Filter			FZ-J80DFU

\*1: According to Japan Electric Manufacture's Association JEM 1467, the Max service life is based on the equivalent condition of the smoke from 5 cigarettes per day whereby the dust collection/deodorization power is reduced by half compared with that of new filter. It is recommended to replace the filter more frequently under more severe conditions.  
 \*2: Designated App notifies when filters should be replaced according to usage.

## MAINTENANCE

Remove the dust on the filters.

**NOTE**  
 • Do not wash the filters. Do not expose to sunlight. (Otherwise these filters may lose efficacy.)

### TRUE HEPA FILTER

Maintain and clean only the tagged surface. Do not clean up the opposite surface. The filter is fragile, so be careful not to apply too much pressure.

### ACTIVE CARBON DEODORIZING FILTER

Both surfaces can be maintained and cleaned. The filter is fragile, so be careful not to apply too much pressure.

Some odors absorbed by the filters will break down over time, causing additional odors. Depending on usage conditions, and especially if the product is used in environments significantly more severe than a normal household, these odors may become noticeable sooner than expected. Replace the filter in those cases or if dust is unable to be removed after maintenance.

## REPLACEMENT

See page 12 for directions on how to install the filter when replacing.

- Please consult your dealer for purchase of replacement filter.
- Use only filter designed for this product.
