

PACK LIKE A PRO

GET THE MOST OUT OF YOUR CHILLY ICE BOX

PRE-CHILL BEFORE PACKING

Pre-chill the cooler with ice packs or crushed ice at least 1-hr before packing. Also, make sure food and drinks are frozen or cold before going into the cooler.

USE SOLID ICE CUBES & ICE PACKS

Cubed ice is best for keeping food colder for longer. You can fit more of it into available space. More cold ice = less warm air. Pack in as much ice as possible, right to the top!

FOOD/DRINK FIRST, ICE LAST

Cold air travels downwards. Load your cold drinks/food first, then fill to the top with cubed ice. This displaces the warmer air and will give you maximum ice retention.

KEEP OUT OF THE SUN

Be aware that a tent, trailer and car can all get significantly hotter than the outside temperature. Where possible, store your cooler outdoors and out of the sun.

KEEP THE LID CLOSED

Go into the cooler only for what you need, then shut and latch the lid immediately so you're not unnecessarily venting cool, beneficial air. Consider a separate cooler for frequently accessed items, like drinks.

COOLER CARE

Clean using a mild soap and warm water. Air dry thoroughly with the lid open before storing to avoid mold and mildew.

Chilly Moose products are distributed exclusively in Canada and the United States by Georgian Bay Leisure Distributors Ltd. - www.georgianbayleisure.com

Does every Chilly Moose cooler come with a tree? Well, sort of...

Chilly Moose and Georgian Bay Leisure are extremely proud to partner with **Tree Canada** in support of the **National Greening Program**.

The National Greening Program is mass seedling plantings across Canada, where there is a need for reforestation or afforestation. In addition to the restoration of forests and wildlife habitat, trees planted through the program contribute to cleaner air, cleaner soil, and cleaner waterways.

For every 25L or 35L Chilly Moose cooler sold in Canada, Georgian Bay Leisure will donate **one tree** for planting. For every 55L or 75L Chilly Moose cooler sold, **two trees** will be planted. As an added touch, the trees will be planted in the same region of Canada where each cooler is sold.

While your Chilly Moose won't actually have a tree in it, you can be proud that your purchase helps support healthy forests in Canada.
