NEW & IMPROVED
Reflexion® Lifestyle Bases

FOLDABLE ARCHITECTURE

Introducing packaging that is compact and easier to deliver. The new hinged design allows the unit to be folded in half, helping customers and delivery crews to navigate up narrow stairwells, around sharp corners and small spaces with less effort. The compact packaging helps to maximize storage in warehouses and on delivery trucks. Simply unfold the base, plug-in and it's ready to use.

LIGHTER CONSTRUCTION

The new construction has decreased the unit weight while maintaining the durability of the adjustable base. The lighter design makes lifting the unit easier, which allows for a seamless delivery while also giving homeowners the ability to more readily move the base from one room to another.

CARRIER FRIENDLY PACKAGING

All units can now be shipped with all major carriers.
Shippable sizes (Fed Ex, UPS, etc.): Twin Long, Double and Queen
