Material: Quartered Ash Wood Veneers

Frame Construction: Pulaski uses carefully chosen solid wood and select wood veneers over durable wood products in our furniture construction. Use of veneers enables more decorative looks unattainable with solid wood. Veneers are used over durable wood products such as medium density fiberboard (MDF) and particle board, made of renewable resources. MDF and particle board are used in quality furniture for areas that need to be stable, such as large surfaces. These durable wood products do not expand and contract with heat

and cold and do not absorb moisture as much as solid wood, which results in stronger and longer-lasting furniture.

Fabric 1: Rhinestone, 100% Polyester, WS: Water-based cleaning agents, foam or mild water-free cleaning solvents may be used. Never use tap water. Use distilled water, as tap water contains minerals that may cause rings or fading.
