

With reliable dehumidifier units, Keystone produces consistent dehumidification to keep you comfortable, even on the most humid days. This commercial dehumidifier can effectively dehumidify rooms up to 2000 square feet to remove 110 pints of moisture from the air per day with a 1.45-gallon water tank to collect the discarded moisture. An alarm will sound when the tank is full so you know when it's time to empty. When it's time, simply attach the included 8.25-ft. drain hose and press the drain button to begin the emptying process. Convenience features include a programmable 24-hour timer, and outage memory so if the power goes out, the unit will start back up exactly where it left off. You'll know when it's time to easily remove and clean the mesh filter with the Check Filter alert. Keystone not only provides a 1-year warranty but ensures that you stay dry and comfortable at a cost-conscious price.

## Dehumidifier

| MODEL                       | KSTAD110PD     |
