## XOE - MUA make-up air compliant

The XOE is part of our Performance collection, designed with the Do-It-Yourselfer and smaller kitchen makeovers in mind. It provides customers the opportunity to employ XO quality and innovation to vent their kitchen without having to re-invent their kitchen. Available in three finishes and ducted or ductless, recirculating models.

### What does Make-Up Air Compliant mean?

For the last several years, codes and standards required Make-Up air for domestic range hoods with exhaust rates exceeding a certain limit. The International Residential Code Section M1503.4 and the International Mechanical Code Section 505.2 require Make-Up air for all domestic range hoods in excess of 400 cfm. State, county and local codes may be more restrictive. Always check with your jurisdiction for specific Make-Up air requirements in your area.
