

2020 PRODUCT CATALOG

WELCOME TO THE **FAMILY**

Our Products

From our handcrafted wood to hand-welded stainless steel, craftsmanship is the foundation of our company. Through attention to detail, hard work, and hours of testing, we guarantee you will receive an industry leading appliance that lasts a lifetime.

Our People

We believe in the value of our people; from our unrivaled customer service to our top reviewed products, we are the industry leader in kitchen innovation.

Our Passion

Born out of Andrew Zuro's vision, our motto is simple: passion through innovation.

ZLINE State of Mind

In Fall 2019, ZLINE produced new environmentally sound shipping boxes that eliminate up to 35% of waste and assist in reducing CO₂ emissions. ZLINE continues to strive for the highest environmental standard in the industry.

BLACK STAINLESS STEEL PROFESSIONAL RANGES

RAB series

An executive upgrade to wow the chef and guests alike.

With streamlined design, ZLINE's black stainless steel ranges are feature-focused and deliver practical cost with perfected design. Features include brass burners imported directly from Italy, triple layer insulated glass paneling, and cast iron grills that sustain heat three times longer than other grill types. The black stainless steel hue is achieved by a process termed *bluing*. *Bluing* is a technique used historically to modify the finish of gun barrels.

Simply captivating, ZLINE's black stainless steel ranges are a luxury range at a fraction of the cost.

DURASNOW STAINLESS STEEL PROFESSIONAL RANGES

RAS series

Revolutionary design.

Matching the allure of stainless steel appliances, *DuraSnow* stainless steel is fingerprint, corrosion, and rust-resistant. Outshining all competitors in its class with its non-directional and scratch-resistant finish, *DuraSnow* is made from 304-grade stainless steel. Scratches can be buffed out due to the durable nature and non-directional finish, removing life's everyday wear and tear.

As ZLINE continues to innovate and grow, we are proud to offer full kitchen suites entirely in this revolutionary grade. ZLINE is the exclusive manufacturer of *DuraSnow*, making it not just a finish of stainless steel, but an elite finish in a class all its own.

DURASNOW STAINLESS STEEL

Classic brushed stainless steel appliances look beautiful, until their first scratch. Until now, it has been nearly impossible to restore the finish of stainless steel appliances without replacing them or their components.

Proprietary buffing pads take your ZLINE DuraSnow appliance back to the original finish. This unique feature allows DuraSnow to retain its look years after installation, bringing lasting luxury to even the busiest kitchen.

INDUCTION COOKTOP

Modern power. Safe technology.

Technology yields progression. Electromagnetic heating technology emits heat into the cookware itself rather than atop the surface burner. This design uses premium glass which distributes and retains heat more efficiently than other cooktop types.

POWER BOOST - maximum heat for quick cooking

POWER SHARE BURNERS - multiple burners sharing specific temperatures

LOCK CONTROL - a precise temperature control feature that delivers a high-quality cooking experience by holding exact cooktop temperatures.

As technology advances, so should your kitchen - which is why ZLINE will always be on the forefront of innovation.

AN INDUSTRY FIRST LIFETIME WARRANTY

ZLINE motors are incredibly powerful, yet quiet compared to the competitors. This is achieved through the highly durable steel-on-steel construction and unique centrifugal design. At the highest setting, ZLINE motors max out at 56 decibels, and are around 30 decibels at their lowest, producing sound so quiet it will never command the attention of your dinner party.

ZLINE is the only company in the industry that offers a lifetime warranty on the motor.

STAINLESS STEEL RANGE HOODS

Petite power or elite power? The choice is yours.

ZLINE's proprietary classic stainless steel is one grade above surgical steel — matching its professional performance with an equally professional look. All products are designed and shipped from the United States with materials carefully sourced from all over the world - from Eastern Asia to Italy.

Classic ZLINE 430-grade stainless steel is the most versatile finish in the industry. Due to its rust, temperature, and corrosion-resistant properties, it is exceedingly low maintenance in its sophisticated simplicity. Stainless steel range hoods deliver superior performance, multiple speed control, and elegant industrial design. If makeup air is in your vocabulary, ZLINE offers options that will meet any contractor's requirements.

**DURASNOW STAINLESS STEEL
RANGE HOODS**

Unrivaled.

While beautifully matching the aesthetic of any stainless steel appliance, *DuraSnow* is unique due to its fingerprint, corrosion, and rust resistant properties — all while maintaining a gorgeous stainless steel charisma. The non-directional and scratch resistant nature provides incomparable durability — exceeding all competitors in its class.

ZLINE is proud to offer full kitchen suites entirely in this revolutionary stainless steel grade. *DuraSnow* is produced exclusively by ZLINE as it continues to advance the kitchen and bath industry.

ALL DURASNOW STAINLESS
STEEL RANGE HOODS ARE

8654

8654 COLORED COLLECTION

This collection presents a vast assortment of finishes that have never been offered before. *DuraSnow* stainless steel combined with interchangeable shells allow this range hood to be fully customizable.

DESIGNER COPPER

Copper is timeless.

First used over 10,000 years ago, copper is tried and true. A basic chemical element, copper is used in a wide array of products worldwide, making it known as *Man's Eternal Metal*.

Understanding the unsurpassed quality and elite culture copper range hoods bring to a kitchen, ZLINE manufactures its copper utilizing a professional process. The technique takes hours to complete and begins and ends by hand.

The warmth a ZLINE copper range hood brings to your kitchen is achieved through the proprietary 7-layer hand rubbed finish and great attention to detail. The combination of this intricate process and high-quality construction allow ZLINE copper range hoods to be outdoor certified. The copper finish prevents tarnishing, rusting, or oxidizing while withstanding the elements.

ZLINE's copper finish is the obvious choice for an elite upgrade highlighting the entire home with a sophisticated old-world charm.

HANDCRAFTED WOOD

The strength of steel with the spirit of nature.

Handcrafted designer wood is unique to ZLINE as the pioneer of premium wood range hoods. Globally sourced from the US, Italy, Germany, and Asia, ZLINE designer wood range hoods are crafted with the finest quality materials. ZLINE's craftsmen perfected their skillset for over a decade, always innovating, improving, and progressing.

ZLINE's wood range hoods make a bold statement and are built to last. The extensive collection has expanded to include unfinished wood that can be painted and stained to match the décor of any kitchen.

HANDCRAFTED FINISHES

SHIPLAP is the construction of horizontal planks connected in sync by rabbet joints creating a system called *tongue and groove*. Historically, this technique has been used in the construction of ships, permitting the wood to be watertight and highly durable. This allows the wood to contract and expand, making it great for versatile environments that evoke humidity and frequent weather changes.

Each shiplap wood range hood includes upgraded features like illuminating LED lighting, dishwasher safe stainless steel baffle filters, and durable push button control paneling. All designer wood comes complete with customized crown molding tailored to the specific range hood — finalizing a seamless look.

INSERTS

High performance. Low profile.

Get the job done with a ZLINE insert. Seamless installation into cabinetry and efficient performance will deliver the same power that traditional range hoods offer. Fully integrated, range hood inserts provide quiet performance, powerful filtration, durable design, and the industry's easiest installation.

A premier economic choice, inserts are customizable and low maintenance. The possibilities are endless with a ZLINE insert.

CROWN MOLDING completes the look of a ZLINE range hood with a beautifully seamless ceiling transition. ZLINE crown moldings fill the gap between range hood and ceiling, providing the perfect touch to complete your kitchen's look. Stainless steel, copper finish, or handcrafted wood - no matter which style of range hood, there is a crown molding available.

UNDERCABINET

An ideal appeal.

Searching for something efficient and low profile? Look no further. ZLINE's undercabinet range hoods provide high-power ventilation with easy installation.

Offering an extensive, professional collection to meet your design needs, ZLINE's undercabinet range hoods are professional, quiet, and efficient. Undercabinets are ideal for the minimalist or kitchens less equipped for a full-sized range hood. Ductless or ducted, undercabinet range hoods come with everything needed to easily install and use.

DISHWASHERS

Panel Ready and Panel-Included

Truly ECO. Truly quiet. Truly customized.

From heavy to ECO settings, ZLINE dishwashers can withstand cleaning everything from heavily soiled pots to delicate wine glasses. ZLINE dishwashers are Energy STAR rated, meaning the less water you use, the more money you'll save.

CUSTOMIZABLE dishwashers will easily match your home's unique aesthetic with a wide array of styles that blend seamlessly into your cabinetry. With echo-resistant 430-grade stainless steel and intuitive design, enjoy a peaceful kitchen at only 40 decibels of sound — quieter than its competitors.

The multiple filter system hosts three mesh filters that separate soiled water and clean water into different chambers, optimizing performance while conserving water and energy.

ZLINE's exclusive integrated EcoWash technology and EnergySave functionality determine the most environmentally-conscious cycle based on the load size and soil level. Each cycle reduces water consumption by up to 30% while delivering optimal cleaning results.

SINKS

Professionally inspired.

Each ZLINE sink is handcrafted and intuitively designed to offer the most efficient washing experience. Inspired by professional kitchens, every sink is versatile and spacious. The extra-deep, high capacity basins easily accommodate large pots, pans, and plates. With over 10 inches of depth, there is maximum room for any size wash job.

The geometric design silences sound and creates a quieter workspace. With its stain, scratch, and rust-resistant properties in addition to superior drainage, your new ZLINE sink will provide more usable space and eliminate free-standing water up to three times faster than competitors.

FAUCETS

Let inspiration flow.

ZLINE created a wide range of faucet solutions delivering comfortable elegance and undeniable quality down to the smallest detail. Brass housing allows ZLINE faucets to be durable and provides sophistication. It's what's on the inside that counts.

Behind the scenes, ZLINE's main focus is improving water efficiency. The faucets are manufactured with carefully hand selected materials that undergo over 50,000 unit tests, well over the industry standard for certification of 15,000 tests. 1.8 gal/min provides the perfect aerated water pressure — saving water, energy, and time at the best price point in the industry.

BATH COLLECTION

Set your style.

Sourced with materials from across the world, ZLINE's bath collection is easy to operate, reduces water waste, and complements bathroom décor. This exclusive collection blends modern technology with traditional appeal — offering a wide array of styles and finishes.

Each faucet and shower offers an aerated water flow for resource conservation, helping both the environment and your wallet. The housing material composition consists largely of brass, which is extremely durable and leak proof. Every product produced is examined thoroughly by hand to ensure quality and consistency.
