MHN33 High-Efficiency Front-Load Washer

WHAT'S INSIDE MATTERS®

DURACORE DRIVE SYSTEM

The DuraCore Drive System's advanced design increases the longevity of the machine. A watertight, flexible, triple-lip seal with garter spring keeps moisture away from the shaft, protecting our premium bearings, while our durable shaft sleeve is designed to eliminate shaft wear. These improvements, along with a die-cast trunnion, result in more turns over the life of the washer, boosting a facility's bottom line.

FEATURES:

TRIPLE-LIP SEAL
WITH GARTER SPRING

1 Triple-Lip Seal with Garter Spring

Provides a more effective seal. Addition of garter spring enhances support if any deflection occurs.

SHAFT
SLEEVE

2 Shaft Sleeve

The robust shaft sleeve locks the two inner races of the premium bearings ensuring they turn with the shaft, helping to prevent drive shaft wear.

PREMIUM
BEARINGS

3 Premium Bearings

Premium bearings are sealed for added protection enhancing longevity of the drive system.

DIE-CAST
TRUNNION

4 Die-Cast Trunnion

Shock-resistant, die-cast trunnion and robust drive shaft provide additional strength to overall drive system and basket structure.
