HASTINGS INSTALLATION INSTRUCTIONS AND RECOMMENDATIONS

LOCATION:

- Locate the Hastings grill only in a well-ventilated area.
- Never locate the grill in a building, garage, breezeway, shed or other such enclosed area without an approved ventilation system.
- The grill is not to be located under any overhead unprotected combustible construction.
- The grill may be placed adjacent to non-combustible construction.

BUILT-IN STRUCTURE DIMENSIONS:

ALL DIMENSIONS ARE TO FINISHED SURFACES.

- A minimum of 12" must be maintained from the back and sides of the unit to any combustible construction.
- Never install a Hastings where any parts of the grill are adjacent to combustible materials. Any flammable material close to or touching the grill should be protected.
- We recommend that you research your options carefully, and don't forget to insulate behind the unit as well.

CLEARANCES:

- A minimum of 6" clearance is required on the left side of the lid to allow for rotisserie motor attachment. A 110/120 V outlet is also recommended on the left side of the grill to power the rotisserie motor.
- A minimum of 10¹/₂" is required above the top of unit to open and close the lid.

TOLERANCES:

+¹/₄", -0". Any additional clearance must be within these tolerances or fit of built-in structure may be adversely affected.

CAUTION:

Remember that wooden countertops are flammable! Even if all other construction is masonry, be sure to protect the edges of the counter opening.
