

# Adjustable Beds

With Wired Remote Control

## Owner's Manual

M50

**Attention: Read the following information before using this product. Use of a surge protector is recommended.**

**WARNING:**

Do not open or tamper with the transformer, control box, motors, or remote control (with the exception of battery compartments).

**SMALL CHILDREN AND PETS:**

Immediately dispose of all packing materials as they can cause suffocation to small children and pets. Do not allow any persons or pets under the bed. Children should not operate the bed without adult supervision.

**HEALTH WARNING:**

Please consult your physician before using the massage feature if you have any health conditions you are concerned about, as the massagers may aggravate some conditions. Caution is especially advised for those with pacemakers as the vibrating motion may cause the pacemaker to sense activity.

**PRODUCT RATINGS:**

The bed lift motors are not designed for continuous use of more than 2 minutes in an 18-minute period, or approximately a 10% duty cycle. Any attempt to circumvent or exceed this rating will shorten the life expectancy of the product.

**WEIGHT LIMIT:**

The limitation is 750lbs. The bed will structurally support these weights, provided it is evenly distributed across the head and foot sections when a person is lying down using the bed as intended. This product is not designed to support or lift this amount in the head or foot section alone. Exceeding this weight restriction could damage the bed and/or cause injury. Enter or exit the bed in a flat position and do not sit on the head or foot sections while in the raised position.

**LIFTING AND LOWERING MECHANISMS:**

It is normal for the raising and lowering feature on this bed to emit a minimal humming sound during operation.

**CORD MAINTENANCE:**

Always unplug the base from the electrical outlet before cleaning or servicing the base. If the cord or plug is damaged, discontinue use of the bed base and contact a qualified electrician for examination and repair. Make sure the base is in a flat position, and the vibrating motors are off before unplugging from the power source.

**SETUP and INSTALLATION**  
**Important: We strongly recommend**  
**two people setup and assemble this product.**

**Step 1:**

Check to verify all parts are included before discarding any packing materials.

All electronics and components that need to be installed are located in boxes under the base or attached to the frame.

- A) Wired Remote Control (1)
- B) Input Power Cord (1)
- C) Transformer Power Supply (1)
- D) Legs (6)
- E) Mattress Retainer Bar (1)
- F) Manual (1)

**Step 2:**

With the help of an assistant, place the carton on the floor.

**Step 3:**

Extend the power cord (labeled “b” in the photograph below) and plug it into the power supply (labeled “c” in the photograph below). Connect the power supply and wired remote control to the head motor. The head motor attached to the bottom of the bed.

**Figure 1**

**Step 4:**

- Install the six legs firmly into the base of the frame. (See Figure below).
- Do not over tighten.

**Figure 2**

**Step 5:**

With the help of your assistant, carefully lift the adjustable bed frame and set it in place upright on its legs. Excessive pressure may damage the legs. Remove all protective plastic covering.

Note: Please unplug the bed before completing this step. Check to make sure that all power cords are clear and do not interfere with any adjustable bed mechanisms.

**Step 6:**

Note: Take the mattress retainer bar from packaging. Carefully insert the mattress retainer bar into the two holes on the foot end of the bed base. (See Figure below.)

**Step 7:**

Plug in the adjustable base. You are ready to enjoy!
