Perfect Black

Most televisions sold today require a backlight, but not LG OLED TV. LG OLED pixels create their own light, and can switch off to achieve truly perfect black levels with zero light bleed, revealing exquisite shadow detail while providing the ideal foundation for the ultimate in color and contrast.

Active HDR with Dolby Vision™

Active HDR analyzes and optimizes HDR10 content scene-by-scene for an even more striking, more breathtaking High Dynamic Range experience. It also supports Dolby Vision™ as well as the new HLG HDR standard, assuring the most HDR content.

Dolby Atmos®

From state-of-the-art theaters to the home: With Dolby Atmos®, sounds can move anywhere, including above the listener for the ultimate in surround audio. Discover Dolby Atmos (on select titles) through the TV speakers, or pass through to a compatible home theater system for the full experience.
