JL Audio driver combines with a highly efficient, proprietary switching amplifier to deliver astonishing performance from a very compact subwoofer cabinet.

The e112’s subwoofer driver features a radical, deep architecture, designed to create a highly linear, mechanical action. The DMA-Optimized motor design offers enough linear excursion to handle the most intense program material, while demonstrating complete poise when reproducing delicate music material.

E-Sub e112 Features:	
Unbalanced Inputs: Stereo or Mono (two RCA jacks)	E112
High-Level Inputs: Stereo or Mono (removable plug)	Download
Balanced Inputs: None	Frequency Response
Line Outputs: Unbalanced (two RCA jacks): High-Pass (set by crossover) or Pass-Through	Input
Input Grounding: Selectable (Isolated or Grounded)	E112
Level Control: Variable: full mute to +15 dB over reference gain	E112
Power Modes: Off, On or Automatic Signal-Sensing	Amplifier
Crossover Filter: 24 dB per octave with Linkwitz-Riley alignment	Download
Crossover Frequency Range:	N/A
