Nanobionic®

Using Nanobionic technology, the cover redirects your bodies infrared rays to recharge your body faster and more efficiently, promoting restful sleep.

FDA General Wellness Product

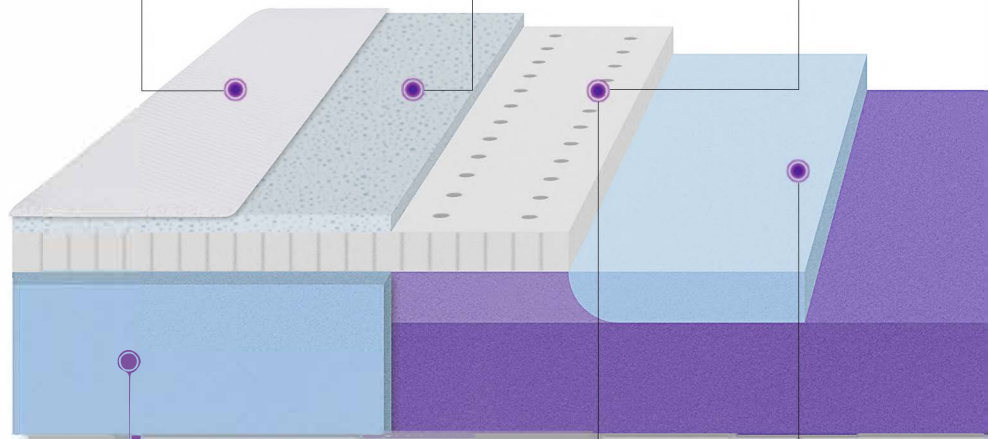

GELFlex®

Using GelFlex Plus, our premium memory foam topper is infused with gel particles. It cools you down when you're hot and warms you up when you're cold.

Antimicrobial

The top layer is anti-microbial. It provides a healthier sleep by inhibiting the growth of bacteria.

Polysleep Proprietary Support Frame®

The proprietary support frame offers unequalled support and makes our mattress truly one of kind.

Ventilated

The top layer is made from Ventilated Viscoelastic Hybrid Foam, which allows air to circulate, keeping you cool while adapting to your body temperature.

Zoned Support

Your shoulders and hips require different levels of support. Using denser foam in the center of this layer, it offers targeted support to correctly align your spine. Bye-Bye Backpain!

The Zephyr Mattress is everything you've dreamed of in a sleep experience. Using **Nanobionic Technology**, the cover redirects your bodies infrared rays for a faster recuperation as well as promotes restful sleep. The **Premium Memory Foam** topper uses **GelFlex technology** which helps regulate temperature and offer the most comfortable sleep ever. This 11.5" mattress features a Premium Hybrid Foam, antimicrobial properties, and integrated support frame.
