

RISE™ INDUCTION SLIDE-IN RANGE

Signature Features

MAGNETIC INDUCTION

The precision of gas with the minimalist appeal of glass tap touch controls. The powerful cooktop directly heats just the cookware, leaving the area surrounding the elements cool to the touch.

EMOTIVE CONTROLS

Striking and inviting controls with LED lighting unleash performance at your touch.

AQUALIFT® SELF-CLEANING TECHNOLOGY

Clean the oven with minimal odors at a temperature below 248°F. This innovative 40-minute cycle combines low heat with water to release baked-on spills that can be wiped away once the cycle is complete.*
*Unlike traditional Adjustable Self-Clean Cycle which burns off soils, when using AquaLift® self-clean technology, add water, run the cycle and then manually remove the water and soils with a wet sponge when the cycle is finished.

TRUE CONVECTION

Steady heat from a third element behind the whirling fan ensures circulation around every rack. Flaunt your cooking prowess with mouthwatering, flaky pastries and irresistible roasts.

BRIDGE FUNCTION

Combine two elements with the Bridge Function to create an expanded cooking zone for larger cookware, like braisers and griddles.

RISE™ DESIGN EXPRESSION

Forged for an era of striking proportions, robust lines of the RISE™ Design Expression draw the eye to its traditional yet unconventional design. Indulge in the details — a custom, diamond-knurled handle and a bold badge.

ASSISTED COOKING

By selecting Assisted Boil, Simmer or Melt, the optimal power level is adjusted for you to help bring water to a boil, simmer foods or melt delicate ingredients.

GLIDE RACK

Smooth moves. The rack glides in and out fluidly and quietly, even when fully loaded.

TWO 7-INCH ELEMENTS

A pair of 7-inch elements can be utilized individually for smaller specialty cookware or combined to create an expanded cooking zone for larger braisers and griddles.
