soft touch
- Lights:
2 X LED 24-30 inches
4 X LED 36-40 inches
- ETL approved

ACCESSORIES

- Charcoal filters included

FORTÉ

PRODUCT PLUS

A compact cooker hood designed to sit underneath a kitchen cabinet. With easy to use soft touch push buttons to manage fan speeds, and LED lights at the front of the unit.

Light indicator for grease filter maintenance

The cooker hood automatically informs you when the metal grease filter designed for trapping grease in the air requires cleaning. It is of utmost importance to clean these filters to ensure cooker hood components are protected and to pre-vent bad odours caused by a build-up of grease.

Light indicator for charcoal filter substitution

The cooker hood automatically informs you when the active carbon filter requires replacing. This filter is designed to absorb odours produced when cooking. It is of utmost importance to replace these filters regularly as they lose their efficiency and odour trapping performance.

Adjustable and delayed self-switching off

This function allows you to programme delayed cooker hood shutdown which, in the shortest time possible, provides the right level of air purity in your kitchen.
