FOREST TO FINAL

Zero waste
responsibility
and time-honored
craftsmanship create
beautiful heirlooms
from start to finish.

Quality in equals quality out. That's why unique, quality heirloom furniture begins with a quality creation process. Every step developed and controlled to ensure the furniture you fall in love with today remains the furniture you'll love for generations.

From responsible selective harvest methods used by our own timber crews to ensure forest longevity, to our advanced, proprietary saw mills that minimize waste, our vertically-integrated manufacturing process ensures no detail is ever missed and every piece is built to exact specifications.

WOOD

EXPECTATIONS

The same chair or table made from two different species of wood can look and feel drastically different. Variances in grain, tone and texture create character, personality and emotion. MAVIN offers nine beautiful choices of wood for dining furniture.

MAPLE

Unique color, smooth grain and strength make maple a popular choice among woodworkers of all types. Small closed knots and slight mineral streaks become greatly enhanced when a stain is applied.

QUARTER SAWN OAK

The term quarter sawn refers to the way the log was cut. The reason for doing this is to capture the medullary rays or “flakes” that create an authentic old world look. With the right stains, the flakes take on a majestic shimmer.

OAK

Oak comes in a variety of hues, with a unique grain, which makes it one of the more recognizable species. A common choice, it has a long history of use around the home. Oak is a mainstay in traditional design, but its versatility allows modern pieces to come to life.

RUSTIC OAK

Featuring all the same qualities of traditional oak, it offers other characteristics such as natural knots, more prominent mineral streaks and natural wood checks. It can be significantly enhanced with stains to showcase traditional styles or a fresh modern piece.

CHERRY

Harvested from cherry fruit trees, it is a hardwood famed for its durability and rich red/brown tones. Woodworkers highly prize cherry because of its smooth grain, flexibility and brilliant color.

RUSTIC CHERRY

Featuring white, brown and deep red colors with brown flecks, rustic cherry is a less refined version of traditional cherry. It boasts natural knots and pits throughout each board with fine satin-smooth texture and a circular grain. It will darken with exposure to light and heat.

WORMY MAPLE

Also known as ambrosia maple, this is a specific grade that is selected and sorted to showcase the color variations and mineral streaks caused by the ambrosia beetle. Colors and the flowing patterns vary significantly with dark brown streaks near small worm holes.

WALNUT

Black walnut is highly prized for its dark-colored, true heartwood. The sapwood is cream colored, while the heartwood ranges from light brown to a dark, almost chocolate colored brown, sometimes with hints of purple and with dark streaks. Most walnut wood has a straight grain, although wavy or curly grain does occur.

ELM

Elm can have a beautiful straight or interlocking grain pattern and is known for its resistance to splitting. When finished with our Michaels stain, this species is breathtaking.

WOOD

EXPECTATIONS

The Janka Scale represents the pressure (in pounds) that it takes to mar the kiln dried wood. A higher number means the wood surface is harder. MAVIN furniture is crafted from nine hardy species, ensuring generations of love and performance.

ELM

MAPLE

A strong, fine-grained hardwood with an even texture. Slight color variations add character to this straight grained wood.

QUARTER SAWN OAK

Oak wood which has been cut on an angle to display a tighter grain pattern for a cleaner look.

OAK

A widely used, strong hardwood with a coarse texture and distinct grain pattern.

RUSTIC OAK

Boasts the same qualities as oak, but features many other natural characteristics such as knots, streaks and pits.

WALNUT

A strong, durable hardwood with a mostly straight grain. Its deep tones inspire a feeling of luxury.

CHERRY

A moderately hard, yet very strong wood with a fine grain. Cherry darkens over time, enriching the furniture's appearance each year.

RUSTIC CHERRY

Cherry wood without the uniform, fine grain. Boards with knots, streaks and pits are used, showing the natural beauty and character.

WORMY MAPLE

A cream-colored background with brown and greyish blue stripes. In most, or all of the streaks, there are tiny holes from beetle larvae burrowing into the wood.

ELM

Grey-white to light brown sapwood is very narrow while boasting a vibrant red-brown to dark brown heartwood. The grain can be straight but often is interlocked with a coarse texture.

WOOD

EXPECTATIONS

Imperfections are what make wood so extraordinarily beautiful, creating character that transcends through generations. Here are some of the traits sought out by designers and found in MAVIN fine furniture.

GRAIN

The grain of each wood species, whether coarse or fine-grained, will show through the stain. Be sure to choose the type of wood with a grain that you love. We select boards for the best grain match but please remember that the tightness of the grain can vary greatly from board to board. The contrasting grain in boards bring more interest and character to your furniture.

MINERAL DEPOSITS

These dots and streaks occur randomly throughout wood due to the tree storing minerals or sap. These do not diminish the strength or quality of the furniture, they only add to its uniqueness.

AGING

Wood will darken over time, offering more warmth and depth to furniture underneath the stain. Humidity, light, smoke and even heat and steam from cooking can accelerate the darkening of wood. The darkening effect of aging will be even more extreme when lighter stains are used.

END GRAIN

All of our pieces are solid wood. This means that the end grain will show. This crosscut surface is softer and soaks up more of the stain, giving it a darker appearance.

JOINT LINES

Since wood naturally expands and contracts with age, temperature and humidity, it is possible for small cracks or lines to show at joints. This is normal and does not weaken the furniture when these appear.

COLOR VARIATION

Each board we use in every piece of furniture is unique. The natural variances of wood cause variations in the furniture, regardless of which finish is used.

HARTFORD

A flared chair back and legs add interest to these solid wood dining chairs that can be finished in your choice of any of our finishes. Chair seats have been upholstered for comfort and your fabric selection will add color and pattern to coordinate with your décor. We have paired it with a Rectangular table top finished in a two-tone option and placed atop our double Norfolk pedestal that allows for plenty of leg room during those long holiday meals. This chair comes standard with a wood seat, but is shown here with optional fabric seat.

TABLE: Rectangular Top with one 18" Leaf, Chamfer Edge, Shaker Leg, Quarter Sawn Oak Wood & 113 Michaels Stain

CASE: Sedona Sideboard, Quarter Sawn Oak & 113 Michaels Stain

SEDONA

The rustic beauty of this dining collection is evident in the Mission styling of the chairs and the Rectangular table. The Texas leather upholstery provides a masculine touch, but you can choose any leather or fabric that best displays your special tastes. We have paired the table and chairs with our Sedona sideboard which provides storage and serving space during mealtime. The classic styling of this set is equally at home in a mountain cabin or a new townhouse and will enhance any style décor. This chair comes standard with a wood seat, but is shown here with optional fabric seat.

TABLE EDGES

Adding to the customization of table tops, we also offer different table edge profiles. Each profile is unique, and from our selection you'll be able to find the perfect fit for your home. These are available on all of our table tops except for our Naturale, Copper and Zinc series. Our Naturale table top's biggest feature is a faux live edge, allowing a more intimate connection between your home and the essence of nature. Copper and Zinc have an edge profile slightly harsher than our Standard Edge and is offered as either smooth or with nailheads.

67W x 20D x 36H

HARDWARE: A865-BN,
A847-BN

Shelving includes one adjustable wood shelf behind each set of doors.

FEATURES & ADDITIONS

Hutches and buffets can be ordered separately. Any buffet can be ordered without a hutch. If a hutch is preferred, this must be ordered as a separate item in addition to the buffet.

STANDARD FEATURES

TOUCH LIGHTING

Inset into the dining case itself, our LED lighting will never leave you in the dark.

ENGLISH DOVETAIL JOINTS

Each drawer is constructed by interlocking the wood pieces using the English Dovetail Joint method. This creates a stronger joint connection to provide increased integrity and strength to each drawer to ensure that it lasts a lifetime.

SOFT CLOSE DRAWER SLIDES

Smooth gliding, full extension, soft close drawer slides are equipped on the underside of each drawer. This allows our dining case drawers to feel elegant, weightless and pristine.

ADDITIONAL OPTIONS

WINE RACK

Looking to spruce things up? This selection replaces a section of your selected dining case with a wine rack and wine glass holder. Adding a wine rack will give the hutch an altered visual.

DRAWER LINING

We offer two additional drawer lining options: felt lined drawers and a silverware drawer liner.

SHELVES & DOORS

Customization is endless. We offer the ability to buy additional wood and glass shelves straight from us so you know they'll match perfectly. You can also ask to substitute your doors or shelves with the alternative material. If wood is the standard for the case's doors and shelves, they can be replaced with glass and vice versa.

FABRIC

Here at MAVIN, we want to ensure that every customer has an amazing selection of products to choose from. This is no different when it comes to an assortment of fabric choices for our seating options. There are a plethora of fabrics available and the list keeps expanding.

For a current list of fabric options, please visit a MAVIN Creation Center.

HARDWARE

Just as it is with our other customization options, an astounding selection of hardware is available. Each dining case comes with standard hardware that is item specific, however this can be swapped and upgraded to fit exactly what you desire.

For a current list of hardware options, please visit a MAVIN Creation Center.

TWO TONE

Your furniture can be completely customized, right down to a different stain on the seat of the chair or a special paint color for your cabinet doors. Two colors of stain can be chosen or a paint and stain combination can be selected to give you the color that matches your decor, while keeping the warmth of that beautiful wood glow. You imagine it and we create it.

AVAILABLE COMBINATIONS

CASES

CHAIRS

TABLES

EDGE TREATMENTS

We offer edge treatments to add an additional layer of customization to every piece of furniture. The edge treatments we offer include Burnishing and a Paint Rub Thru Treatment.

BURNISHING

Our expert craftsmen can add shading on the outside edges of each piece using a darker tone to give your furniture a beautiful, burnished look.

PAINT RUB THRU

After your piece is painted, the edges are sanded to let the natural beauty of the wood peek through. This option offers a well-worn look for a more casual atmosphere.

WOOD MAINTENANCE

All MAVIN wood furniture is topcoated with Conversion Varnish, which is the most durable finish used in the furniture industry. This finish has excellent resistance to foods, beverages and common household chemicals, yet still must be properly cared for. Follow these simple guidelines to maintain the beauty of your furniture's finish for many generations.

GENERAL CLEANING

Fingerprints, cooking residues, tobacco smoke, etc. will accumulate on any finished surface. They will not damage the finish, but should be removed occasionally to restore the finish to its original state. Wipe your furniture with a soft, damp cloth with water and distilled white vinegar at a three to one ratio. Wipe with a dry cloth.

SPILLS

Your finish is resistant to most household spills. However, long term exposure to moisture will damage any finish. Wipe spills up right away.

DUST REMOVAL

Dust build-up is simply from airborne particles of dust collecting on the finish. If not properly removed, this build-up may dull or even scratch the finish. Simply wipe the finish with a cloth dampened with water and distilled white vinegar at a three to one ratio.

DISCOLORATION

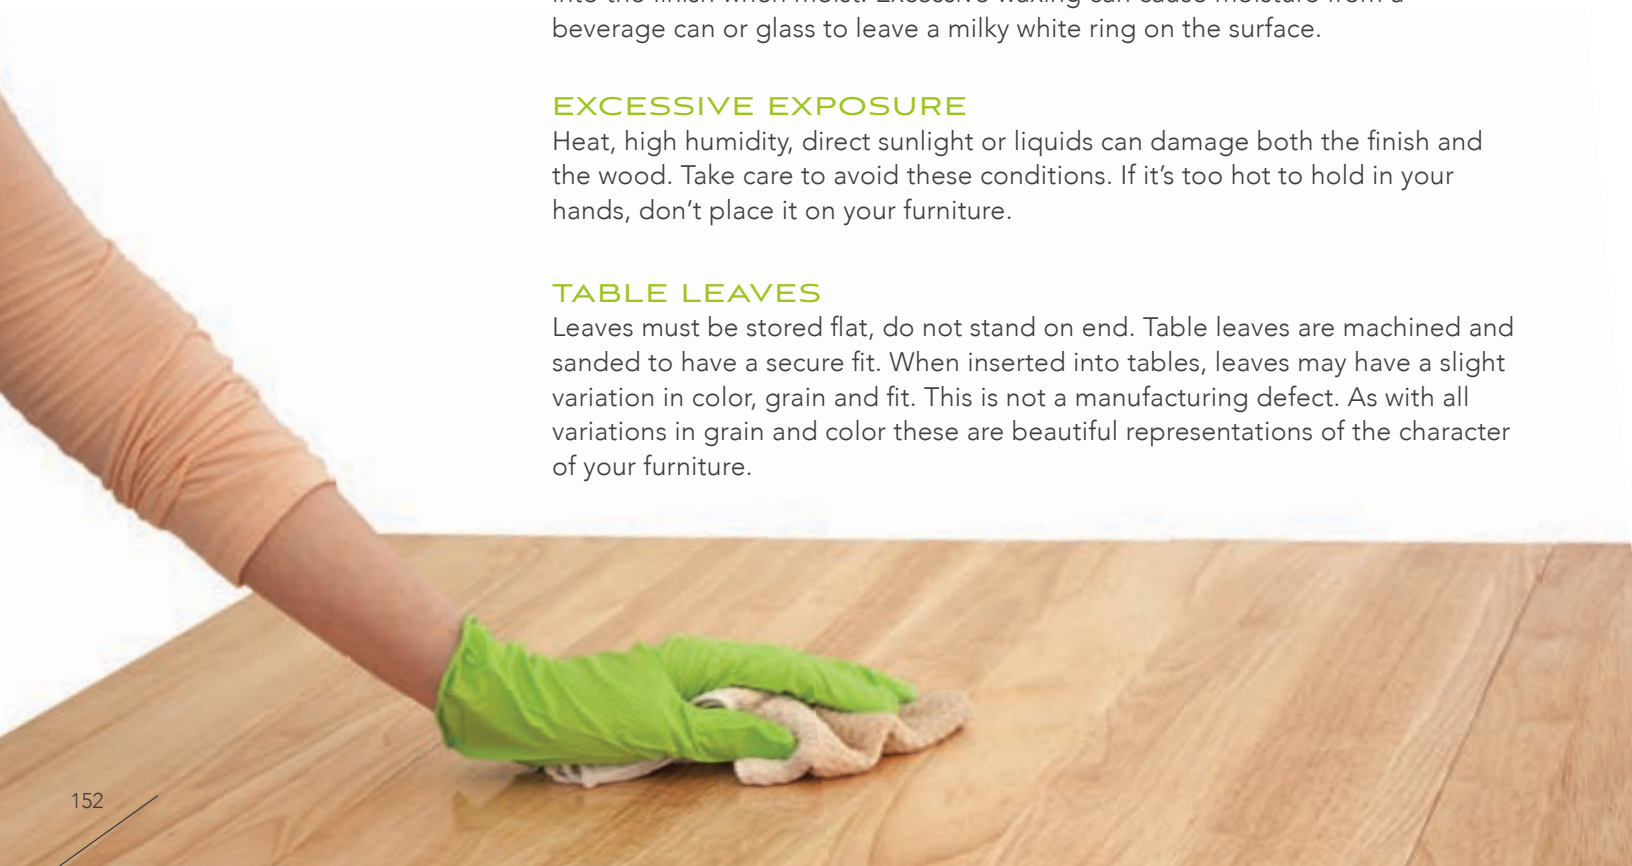

Do not use cleaners containing bleach or ammonia. Ammonia may turn oak black and painted pieces yellow. Dyes and inks may discolor the finish. The ink and dyes from newsprint and plastic bags may penetrate into the finish when moist. Excessive waxing can cause moisture from a beverage can or glass to leave a milky white ring on the surface.

EXCESSIVE EXPOSURE

Heat, high humidity, direct sunlight or liquids can damage both the finish and the wood. Take care to avoid these conditions. If it's too hot to hold in your hands, don't place it on your furniture.

TABLE LEAVES

Leaves must be stored flat, do not stand on end. Table leaves are machined and sanded to have a secure fit. When inserted into tables, leaves may have a slight variation in color, grain and fit. This is not a manufacturing defect. As with all variations in grain and color these are beautiful representations of the character of your furniture.

COPPER MAINTENANCE

The copper contained within the furniture has been sealed with a clear paste wax in order to preserve the finish. It keeps the copper sealed and protected against spills and oxidations.

GENERAL CLEANING

Dusting with a dry cotton cloth should be routine. Mild detergents can be used, but never use abrasive cleaners or metal polishes.

SPILLS

Your finish is resistant to most household spills. However, long term exposure to moisture will damage any finish. Wipe spills up right away.

WAXING

When water no longer beads on the surface it's a good time to wax the copper. Apply a thin coat of clear paste wax to the surface of the copper every few weeks, or as needed. Use any commercially available furniture or wood floor paste wax, let dry 5-10 minutes. Using a clean, dry cotton cloth, such as a kitchen towel, buff to a glossy sheen.

EVERYDAY USE

Use coasters, hot-pads and other materials to protect your copper table top from scratching and abrasion. **Do NOT** apply any metal polish to the copper. These will temporarily strip the patina of the copper.

SCRATCHES AND STAINS

If your copper surface becomes scratched or stained, patience is best. Moisture in the air, over time, will prove to heal the copper. Remember: the color tones noticeable in the copper used are fired directly into the copper itself; so, the best thing to do is leave the affected area alone. In the event the copper is scratched or stained, nine times out of ten the wax sealer was removed with it. Let the area be exposed to the air, until the copper begins to form a patina and regain its original finish. The amount of time your copper takes to do this will vary, but usually takes no more than a few weeks. *To speed up this process, use a catalyst such as salt water, lime juice or other chemicals but should be tested first in small areas to see the effects on the copper itself.* Seal the affected area with paste wax once it has reached a desirable color to preserve and protect the finish.

ZINC MAINTENANCE

Found deep in the earth's crust, zinc has a myriad of uses, both biological and industrial. Zinc is considered a living metal, which means it can change with time to a bluish grey color. It also reacts to anything spilled on it, like wine, and retains the stain color.

At MAVIN, we make zinc more user friendly with a multi step process ending with the application of a commercial-grade Conversion Varnish. This coating helps retain the zinc tabletop's own unique characteristics, while giving it a user friendly finish that locks in most of the original color and markings. This excellent coating is resistant to foods, beverages and common household chemicals. To maintain the beautiful appearance, a few guidelines should be followed.

GENERAL CLEANING

Basic care consists of just a damp cloth with warm water. If soap is used, it should be a mild soap with no abrasives to avoid scratching the surface. This is a durable finish, but like any finish, it can scratch if not cared for properly.

POLISHING

Mild polish may be used 2-3 times a month. **Be sure to use a reputable, non-silicone polish.**

EVERYDAY USE

Zinc can bend, so be careful of blunt impact with sharp objects, and always keep a cutting board handy. It can also warp if objects hotter than 300 degrees are set directly on it, so it is best to keep protective trivets nearby.

Located in the rolling farmland of Ohio's Amish country, MAVIN is a third generation timber and fine furniture manufacturer specializing in custom, heirloom-quality furniture. Backed by the strength of zero-waste manufacturing, full vertical integration and a nationwide distribution network, each piece of custom furniture is luxuriously detailed to last for generations.
