Material: Performance Laminate

Finish Construction: Bella White has the look and feel of wood, executed in a durable resin laminate. High performance laminate surfaces resist cracking up to 158 F, staining, scratching, abrasion, burns, moisture, impact, and fading.

Frame Construction: Samuel Lawrence Furniture uses carefully chosen solid wood and select wood veneers over durable wood products in our furniture construction. Use of veneers enables more decorative looks unattainable with solid wood. Veneers are used over durable wood products such as medium density fiberboard (MDF) and particle board, made of renewable resources. MDF and particle board are used in quality furniture for areas that need to be stable, such as large surfaces. These durable wood products do not expand and contract with heat and cold and do not absorb moisture as much as solid wood, which results in stronger and longer-lasting furniture.

Cleaning Information: W: Water-based cleaning agents or foam. Never use tap water. Use distilled water, as tap water contains minerals that may cause rings or fading
