TWO-PIECE
ELONGATED TOILET

IMPORTANT:
Water supply on the wall is required at 3" or 9" from centerline of the toilet (see rough-in).

First suggested position is hidden behind the toilet. The geometry of the toilet gives space for this installation.

The second suggested position is next to the toilet. Between these two positions, the space for the supply between wall and toilet is limited to 3-1/2". In this case, check your supply and hose dimensions.

NOTES:
This toilet is designed to rough-in at a minimum dimension of 12" (305 mm) from finished wall to C/L of outlet.
Supply not included with fixture and must be ordered separately.

Dimensions shown for location of supply is suggested.

IMPORTANT:
Dimensions of fixtures are nominal and may vary within the range of tolerance established by ANSI Standard A112.19.2.
These measurements are subject to change or cancellation. No responsibility is assumed for use of superseded or voided pages.
